Miriam Rabkin is the principal investigator for the CQUIN project at ICAP. She is an Associate Professor in Epidemiology and Medicine at the Mailman School of Public Health, and Director for Health Systems Strategies at ICAP. At ICAP, she focuses on strengthening health systems, improving access to HIV services in resource-limited settings, and the design, delivery, and evaluation of chronic care programs for HIV and non-communicable diseases. Dr. Rabkin has worked in the field of HIV/AIDS for 20 years, focusing on strengthening health systems to improve the delivery of prevention, care, and treatment services for underserved populations. Her current research focuses on implementation science, and on ways to leverage the successes and lessons of HIV scale-up to strengthen broader health systems, to enhance the quality of programs for HIV, maternal/child health, non-communicable diseases, and infection prevention and control in sub-Saharan Africa, and to improve refugee health services in Turkey, Jordan, and Lebanon.
