Presentation Title

Dr Nomthandazo G.Lukhele

Eswatini National ART Coordinator – MOH

05 November, 2018
Outline

- CQUIN Dashboard results
- Successes and challenges
- Targets and monitoring
- DSD Review Meetings

Eswatini Dashboard Results – 1

Eswatini Dashboard Results – 2

Outline

- CQUIN Dashboard results
- **Successes and challenges**
- Targets and monitoring
- DSD Review Meetings

DSD Scale-up Success:

Early Moring Refill

- Where - Urban Hospitals

- Who – Target working population, doing well on treatment
  - Services is provided by Nurses and Peer educators (Expert clients)

- When – Early hours of the morning from 5:30 am

- What

  – ART Refill,

  – Clinical visits, blood sample collection
  – Adherence support

DSD Scale-up Success:

Early Moring Refill

Best practice - has been functional for almost 10 years at no additional running cost.

- Contributes to the ART program success : 85:87:92 *(Shims 2016)*

- Learnings Exchange visits – Mozambique, Uganda, Zambia

DSD Scale-up Challenge:

- Slow scale up : Since June 2016 – December 2017
- About 15.5% of eligible clients enrolled

Proportion of DSD models offered by facility

Category	Value
# OF FACILITIES IMPLEMENTING 1 DSD MODEL	46
# OF FACILITIES IMPLEMENTING 2 DSD MODELS	26
# OF FACILITIIES IMPLEMENTING 3 DSD MODELS	21
# OF FACILITIES IMPLEMENTING 4 DSD MODELS	24
TOTAL # OF FACILITIES IMPLEMENTING DSD	117

DSD Targets and Monitoring

Increase DSD coverage

- 80 % high volume facilities (>1000 Patients) supported to implement Fast Track and Teen clubs

- Proportion of stable clients enrolled in DSD model to increase from 16% to 45% by December 2018.

- To reduce the average number of clinic visits per client per year to 2 visits for stable clients

- Performance data reviewed Semi-Annually at both Regional and National level

  - To be readily available once CMIS V. 2 is rolled out.

- **DSD Review Meetings**

DSD Review Meetings

Performance data: Coverage

- Lesson learnt - "what is monitored receive attention"
  - Indicators integrated to the existing Regional and National HIV Semi-annual review meetings
  - Sharing of best practices
  - Action plans developed
    - QI initiative
   - In- country DSD learning Exchange

DSD Review Meetings

Figure 2. Facility uptake by DSM

Figure 3. Client uptake by DSDM

DSD Models in Eswatini Jan –June 2017: 3 Regions results

 # clients (virally suppressed <20cp/ml) enrolled on DSD Model — 7230

Total retained into DSD Care — 6904 — 95.5%

 # retained on HIV care and virally suppressed(<20ml cp/ml) — 5097 — 74%

 # retained on HIV care and virally suppressed(20ml - 1000 cp/ml) — 911 — 13%

 # retained on HIV care and virally unsuppressed — 149 — 2%

Retained but not Done VL — 515 — 7%

Comparison with ART Program Data Retention Rate
12 Months = 96 % with DSD Vs. 86 % *(HMIS, 2017)*

Total   Pct% Retained

DSD Review Meetings

- Performance data : Quality
  - Developed DSD Quality Standards
  - To conduct a Client and HCWs satisfaction survey
    - Cost effectiveness - DSD vs. main stream
  - indicators for Advanced disease package (CD4 < 100)
- Performance Data : Impact
  - Annually - National Retention and Viral suppression
  - Every 5 years : National surveys
    - HIV incidence
    - HIV related mortality
    - Stigma reduction

Thank you.
