

Eswatini AHD Dashboard

Dr Hervé N. Kambale

DSD Coordinator, MOH Eswatini

29 July 2020

HIV LEARNING NETWORK
The CQUIN Project for Differentiated Service Delivery

Presentation outline

- AHD dashboard pilot process in-country
 - Stakeholder engagement including recipients of care
 - Data sources
 - Other information sources
- Staging results from country pilot of AHD dashboard
- Feedback on suggested changes to the AHD dashboard
- In-country plans / recommendations to improve the AHD staging

AHD dashboard pilot process in-country

Stakeholder engagement with representatives from:

- Ministry of Health (HIV/TB, DSD, APS units)
- Recipients of Care
- PEPFAR IPs (URC)
- MSF
- Health Facilities

AHD dashboard pilot process in-country (2)

- Data sources
 - Swaziland HIV Management Guidelines, 2018
 - SOPs, Management of Advanced HIV Disease 2019
 - Eswatini Health Sector Response Plan 2018-2023
 - National HIV/AIDS Strategic Framework 2018-2023
- Other sources of information
 - National HIV Report 2018
 - AHD project Report 2019

Staging results from country pilot of AHD dashboard

| | | | | | |
|---|-----------------------|--------------------------------|---|------------------------|-------------------------|
| 6 | | | | | |
| 5 | | | | | |
| 4 | Diagnostic Capability | | M&E | | |
| 3 | Coordination | Patient Coverage | Supply chain management for AHD commodities | | |
| 2 | Guidelines | Training | Facility Coverage | | Quality of AHD services |
| 1 | Policies | National AHD implantation plan | SOPs | Impact of AHD services | Engagement of ROCs |
| | | | | | |

Feedback on suggested changes to the AHD dashboard

- **Facility Coverage:** not easy to estimate because AHD services package is not standard across all levels of care
- **Diagnostic Capability:**
 - It is not possible to recognize gaps because tests are lumped together
 - It would also be better to disaggregate per tests and per level of care
 - It is also better to define an effective referral system
- **Impact of AHD:** Can we consider evaluation of the overall HIV program (VL coverage and suppression) as an evaluation of the AHD services?
- **SOPs:** The dashboard should evaluate the presence of SOPs and Guidelines

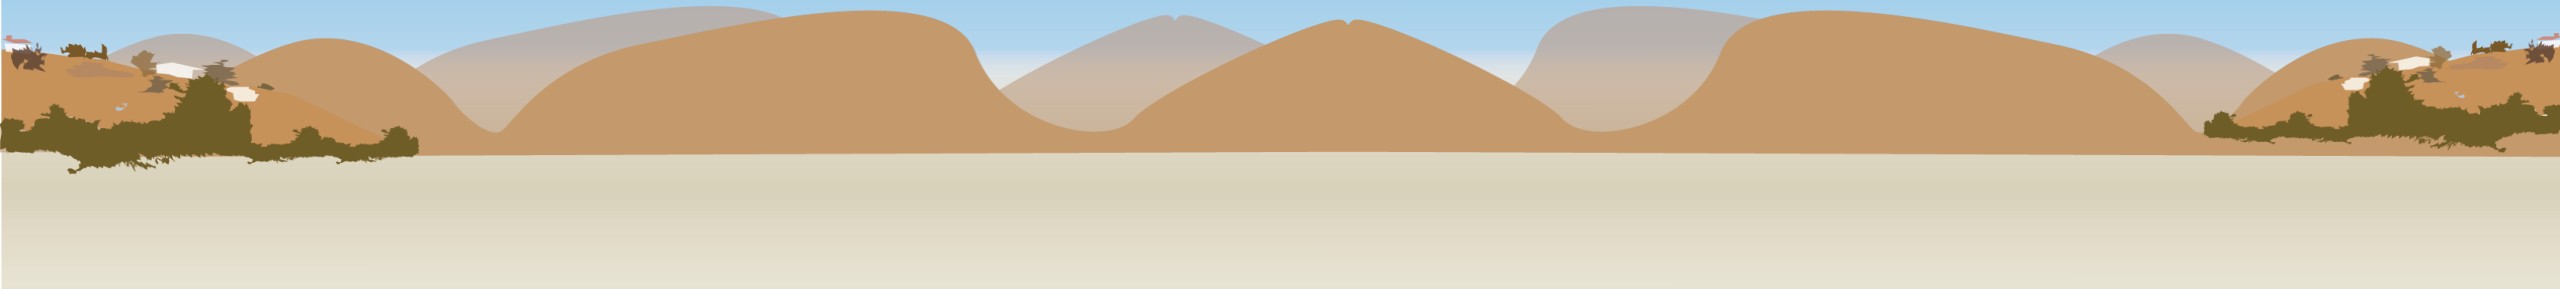

In-country plans / recommendations to improve the AHD staging

- To collaborate with the QI team to develop AHD quality standards
- To actively engage ROCs representatives in the HIV/TB Task team and improve involvement of ROCs in policy development, implementation and M&E of AHD
- Decentralization of AHD services to reach low volume facilities
- Review AHD SOPs to incorporate a short guidance on the management of TB
- Activities already in progress
 - AHD project evaluation, abstract already proved by local IRB
 - Work with the electronic M&E system developer to incorporate AHD indicators into CMIS
