

# Uganda 2020 DSD Performance Review Preliminary Findings

Ivan Lukabwe

STD/AIDS Control Program – Ministry of Health, Uganda

07/12/2020

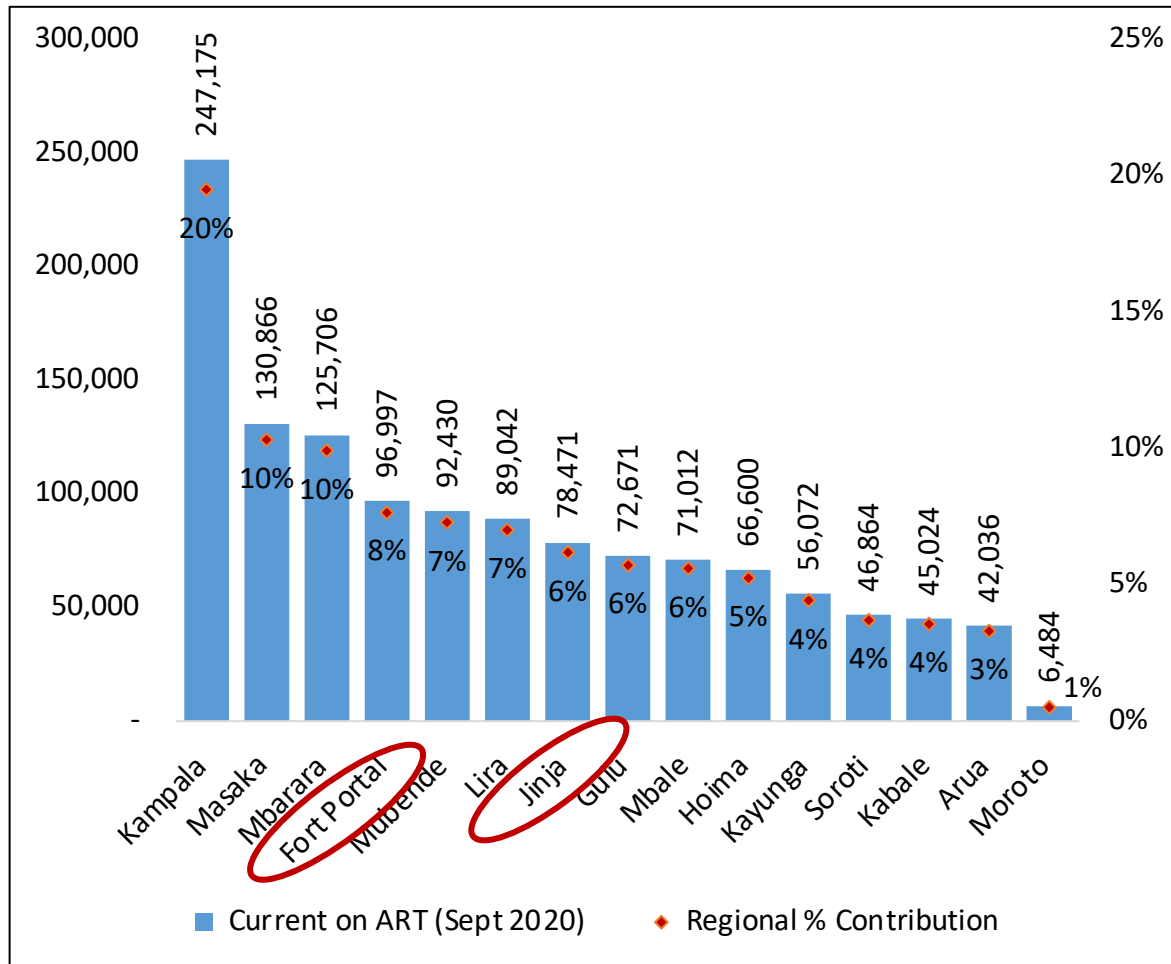

**HIV LEARNING NETWORK**  
The CQUIN Project for Differentiated Service Delivery

# Outline

- Distribution of patients (Sept 2020)
- Recipient of Care Outcomes
- ART models
- Model Appropriateness
- Modified ART cascade
- Model Switch
- Multi month dispensing
- Summary

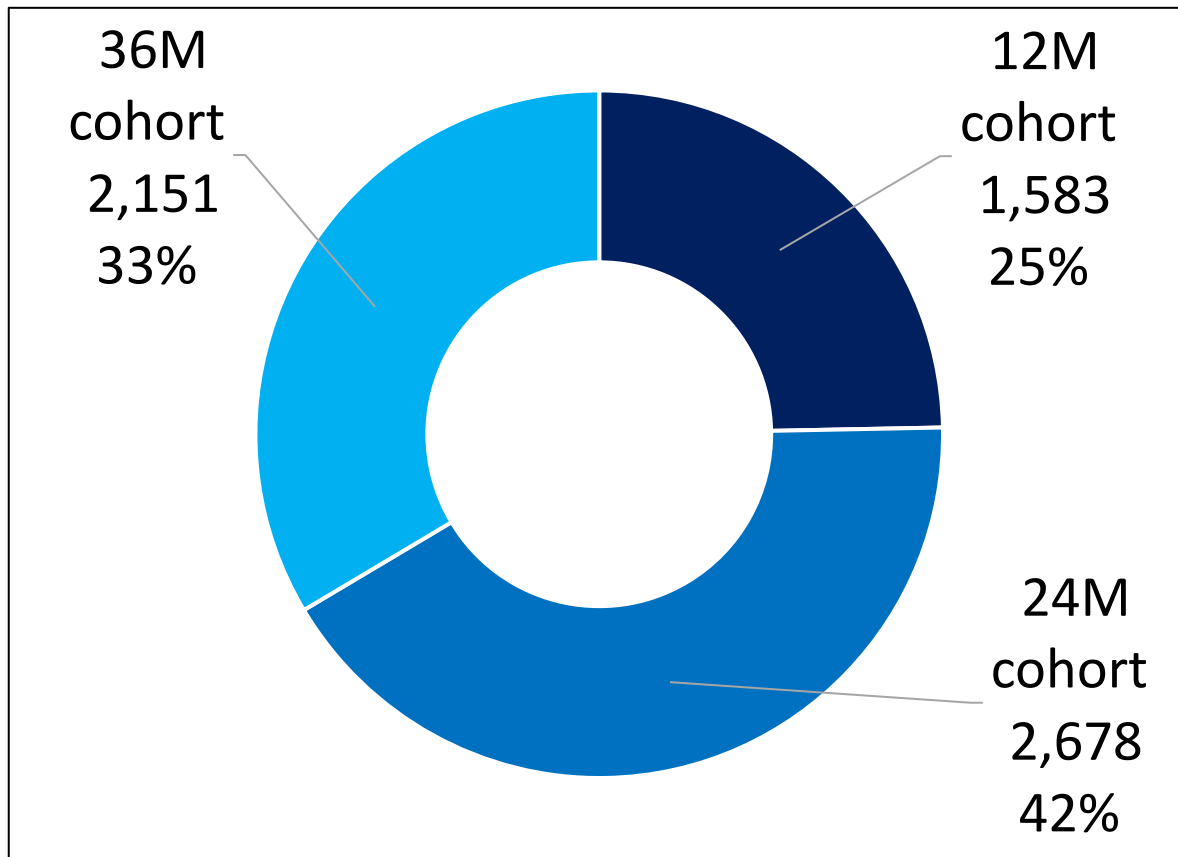

# Distribution of patients (Sept 2020)

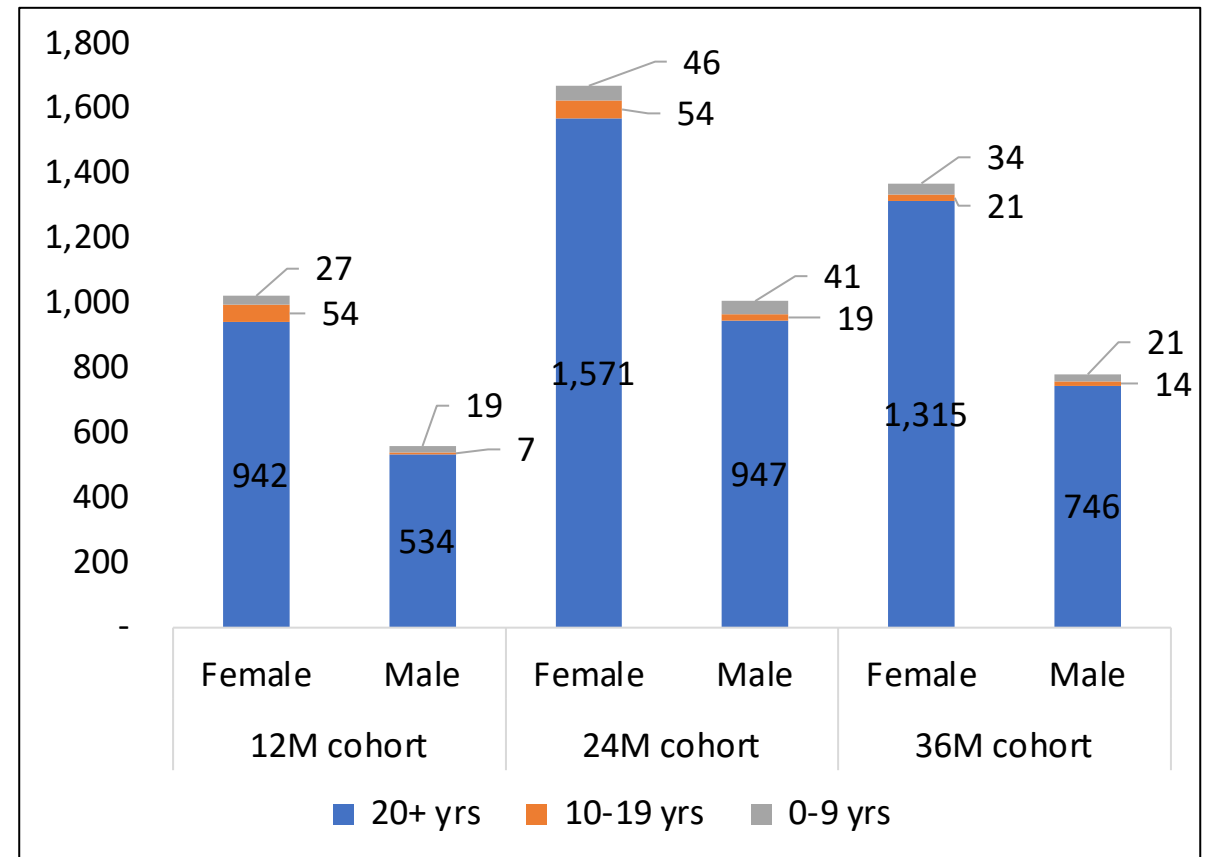

Category	Estimated Current On ART by PLHIVs	Sept 2020	ART Coverage
Overall	1,461,370	1,267,450	86.7%
Male	579,318	452,438	78.1%
Female	882,052	815,012	92.4%
<15yrs	102,296	62,975	61.6%
15+yrs	1,359,074	1,204,475	88.6%
Male 15+yrs	527,540	422,474	80.1%
Female 15+yrs	831,534	782,001	94.0%
Children (0-9 Yrs)	52,000	34,660	66.7%
Adolescents (10-19 Yrs)	103,857	59,111	56.9%

# Summary of Recipient of Care Details

## Cohorts

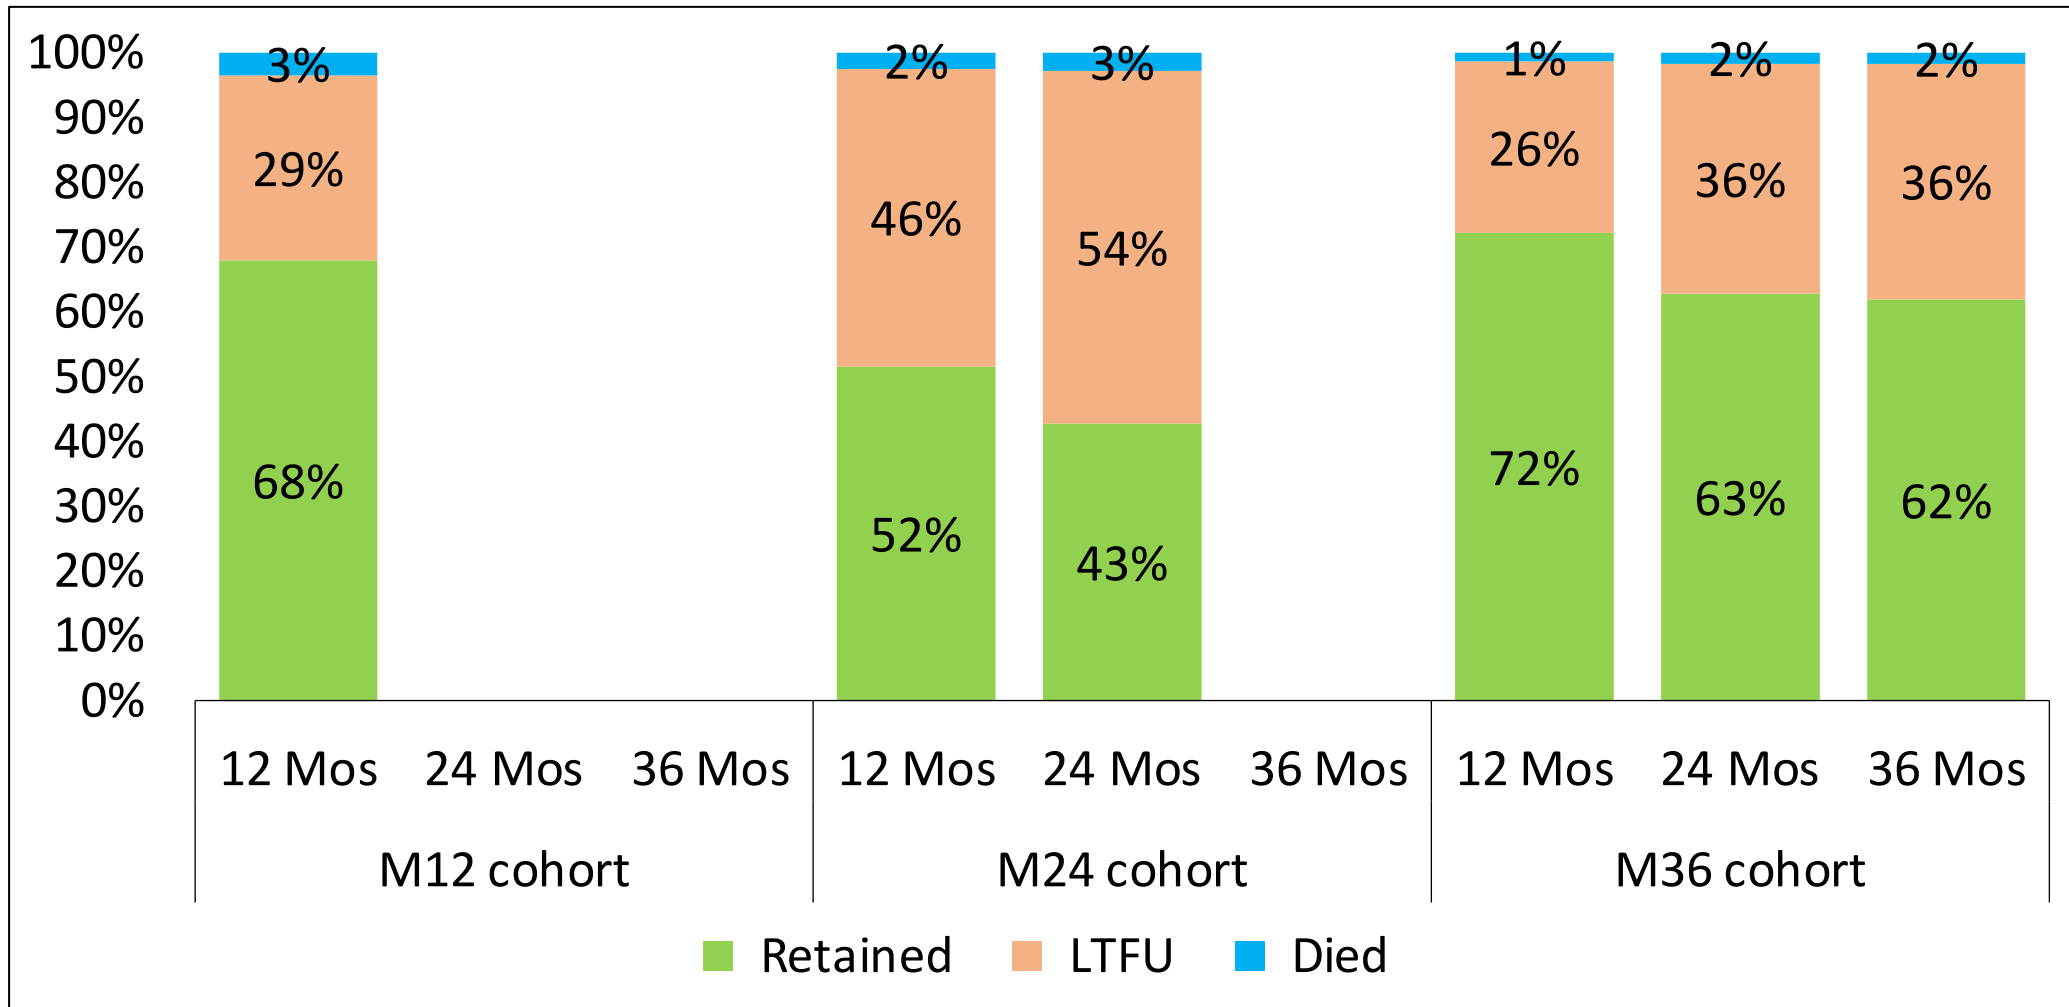

## Sex; Age Group

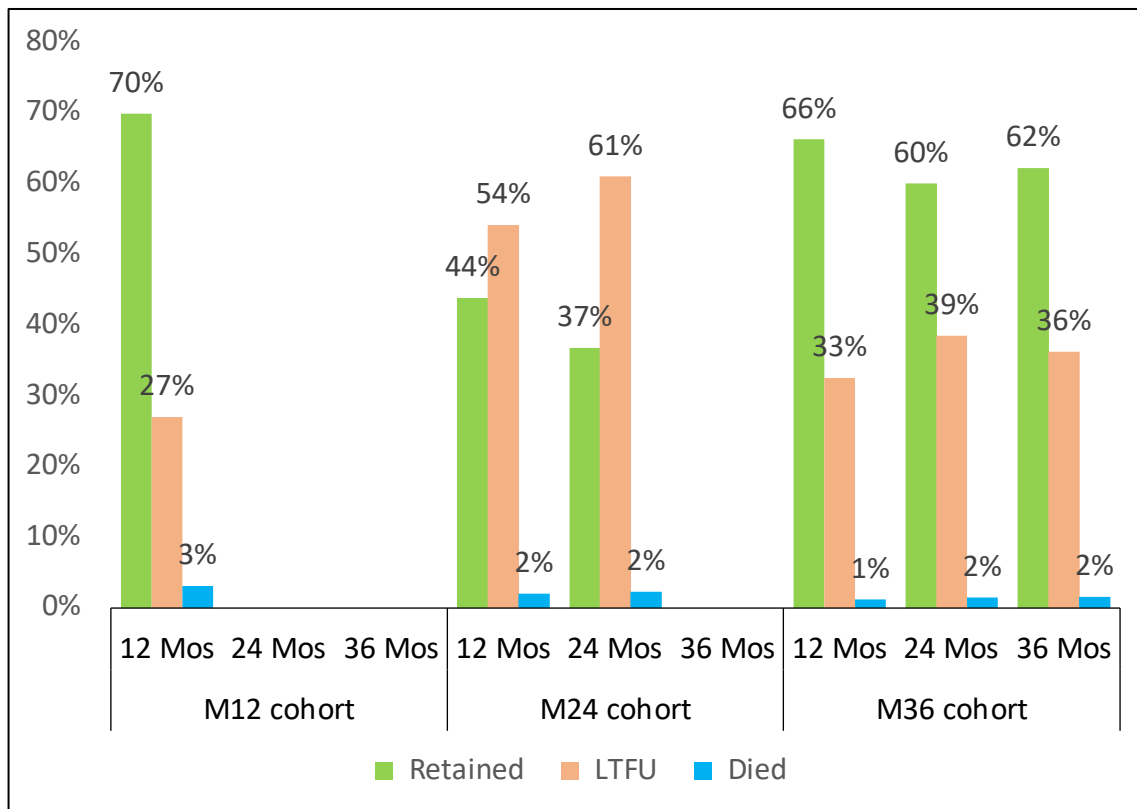

# Preliminary Results

# Recipient of Care Outcomes – 1

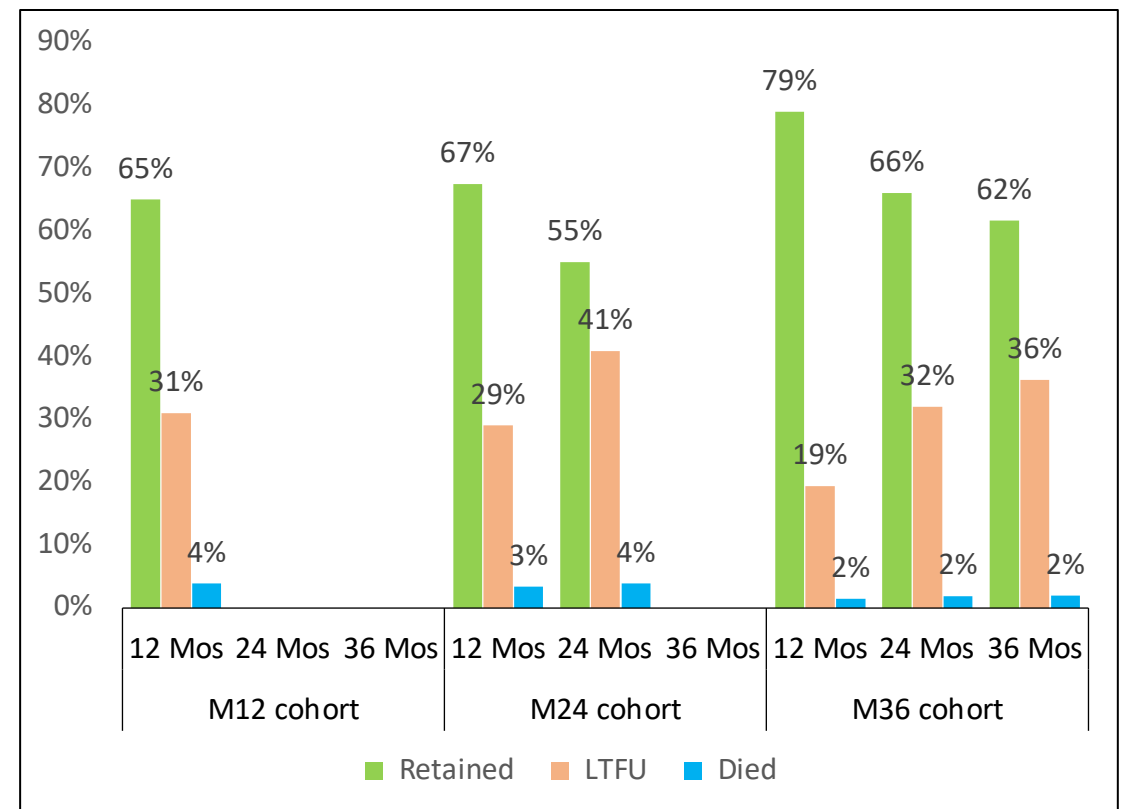

# Recipient of Care Outcomes – 2

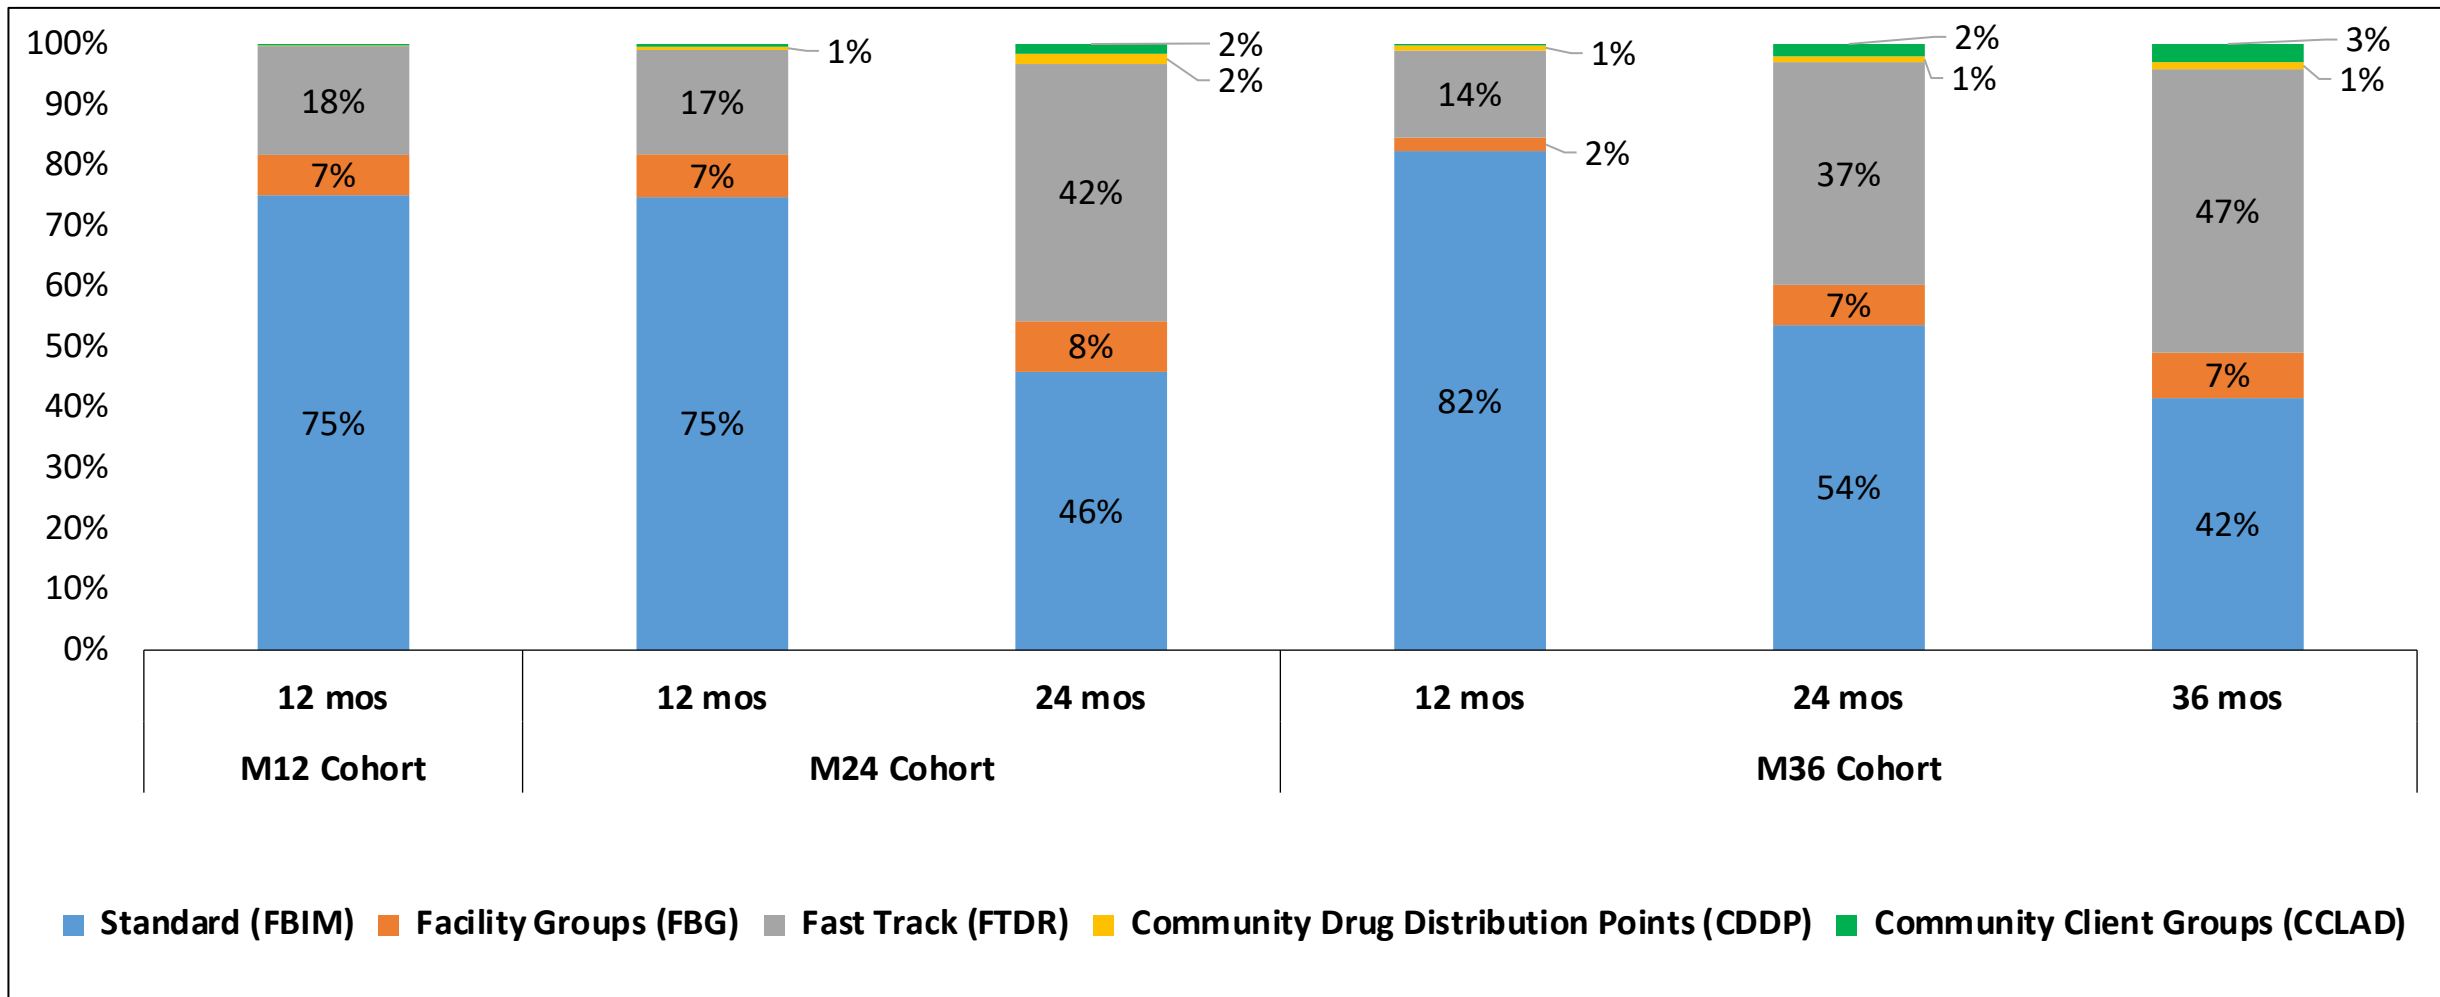

## Health Centers

## Hospitals

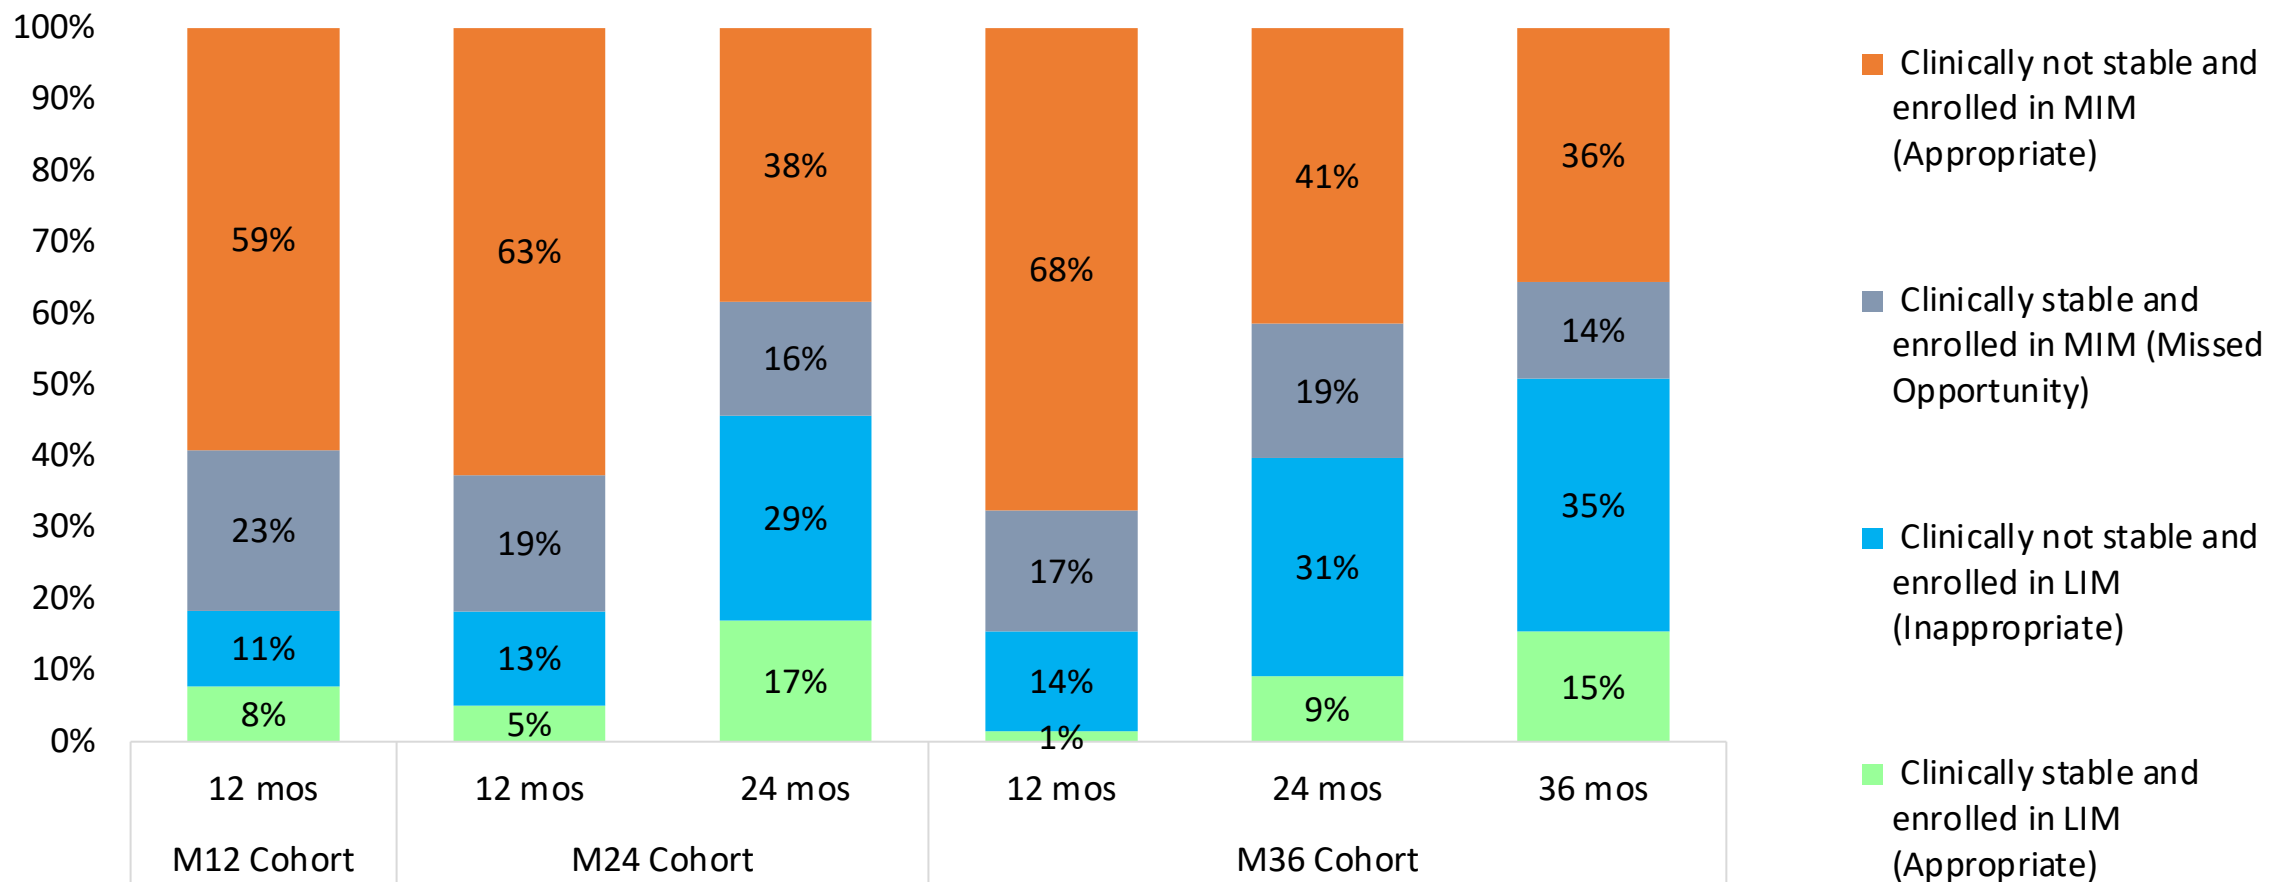

# ART model

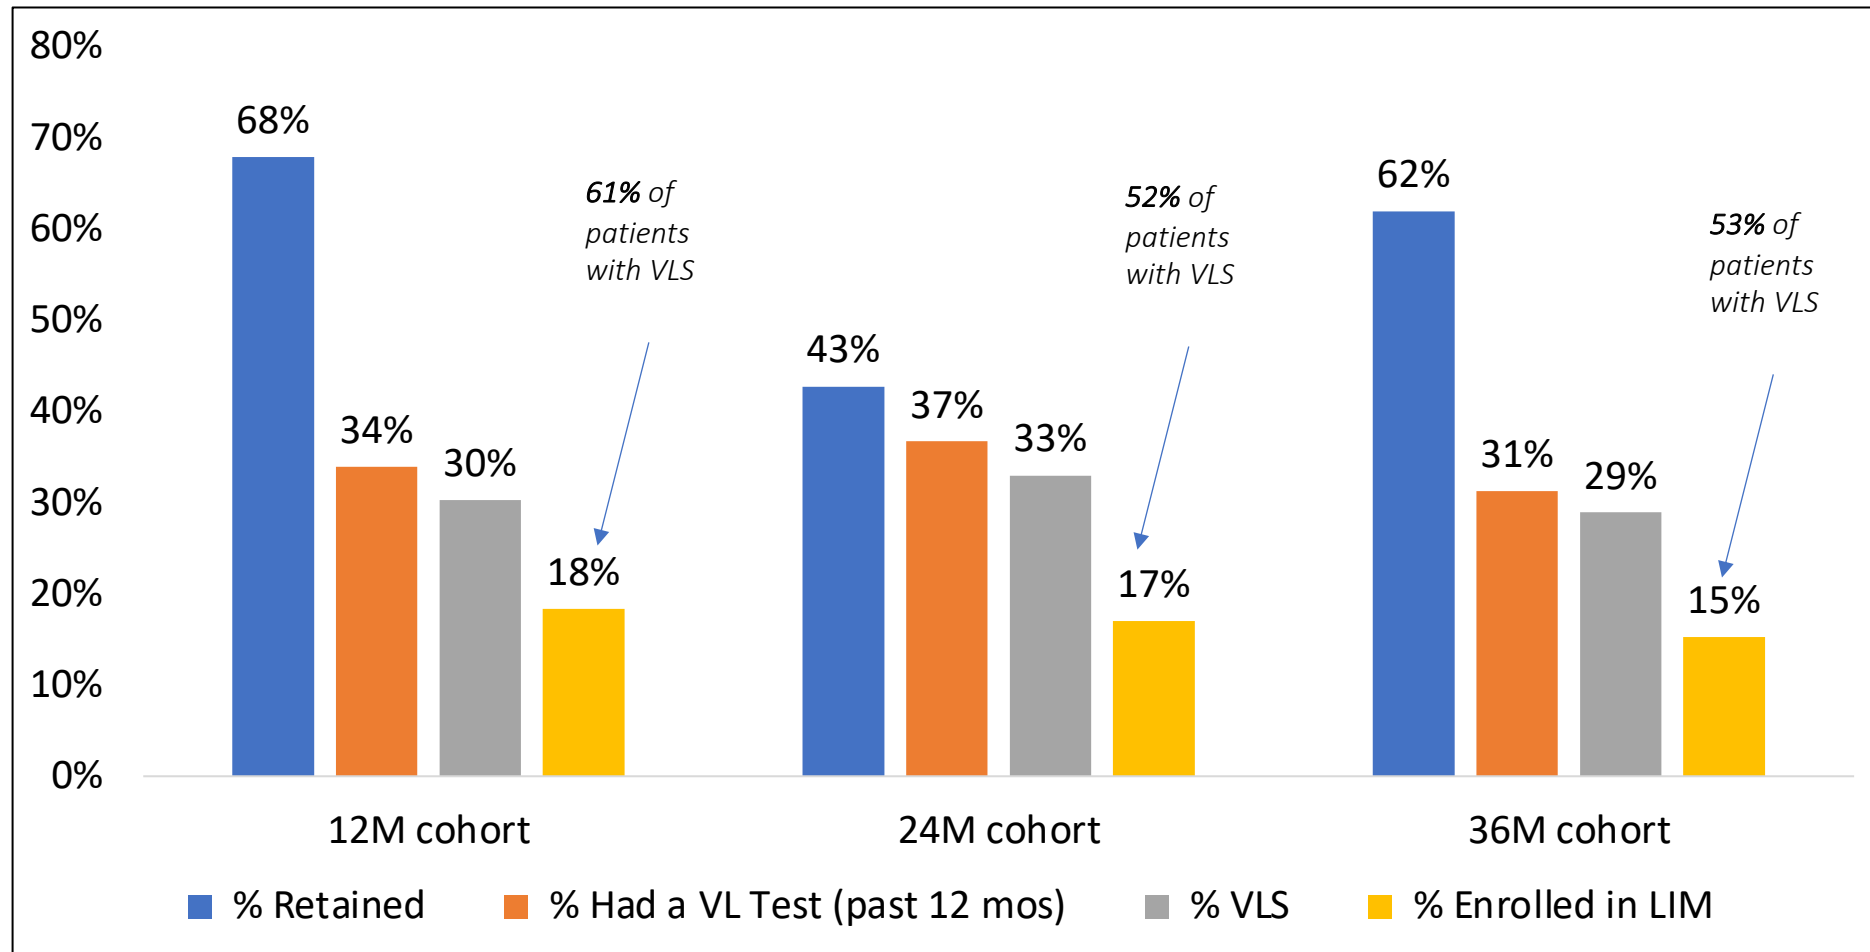

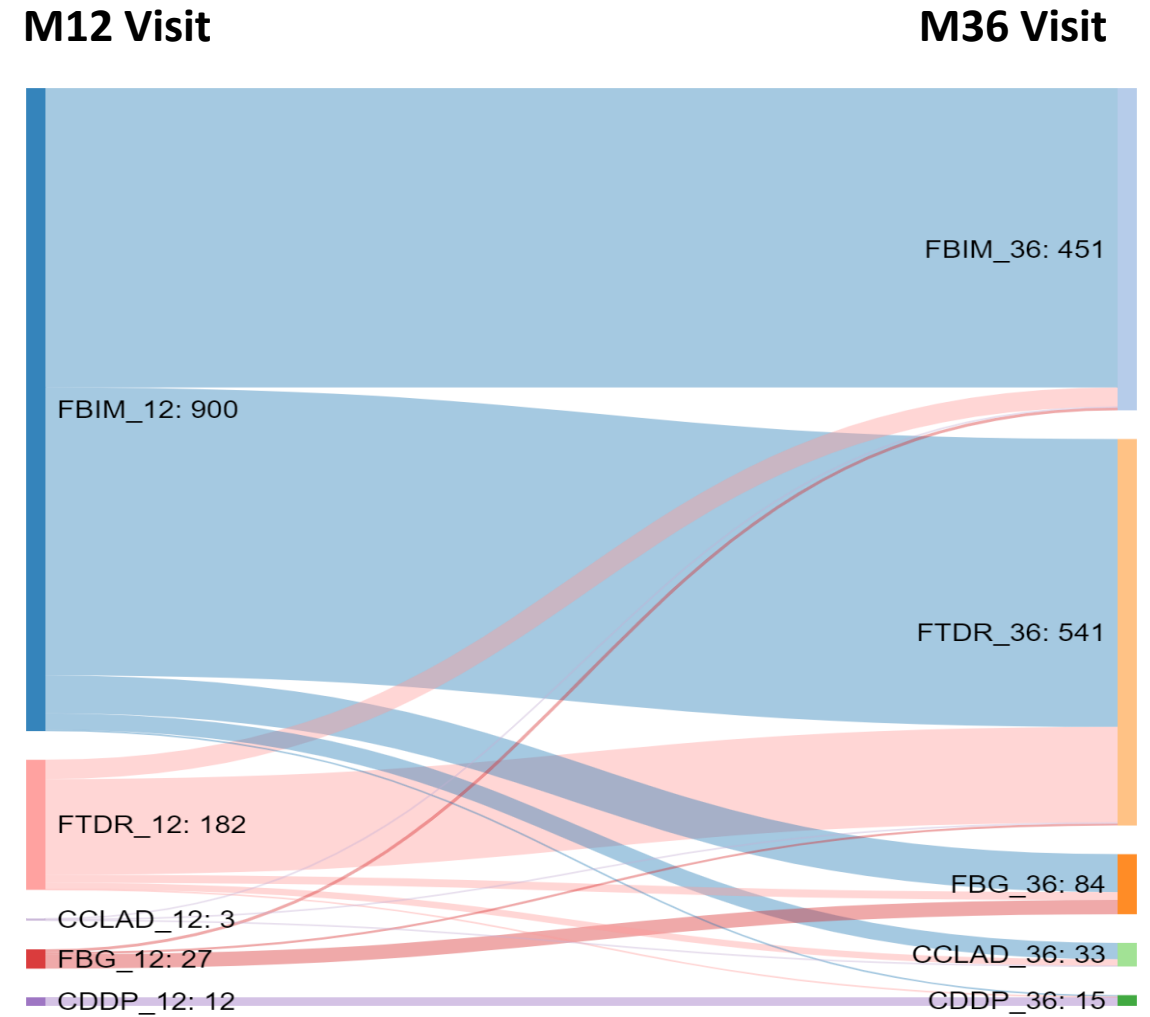

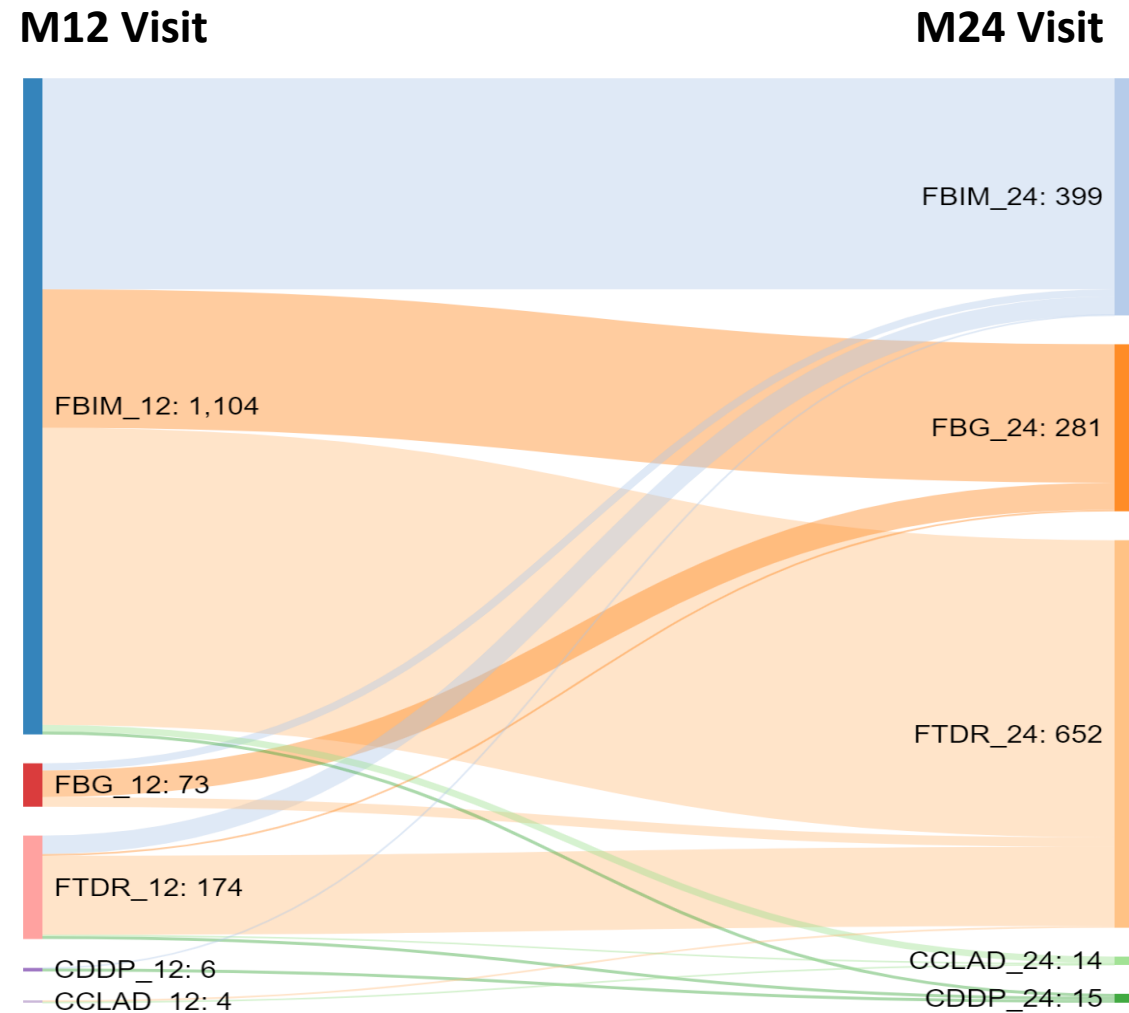

# Model Appropriateness

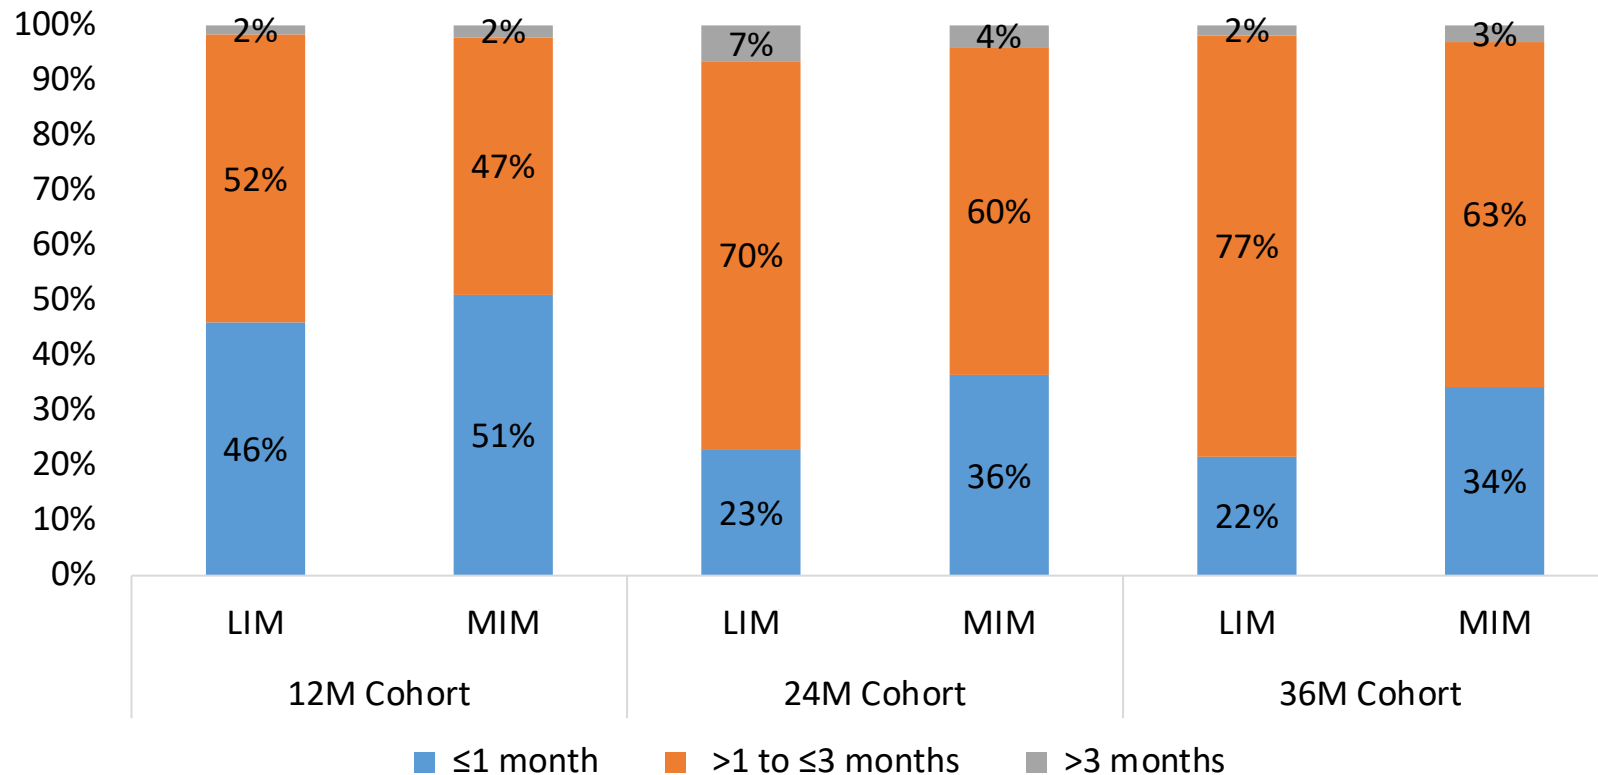

# Modified HIV Cascade (Most recent 12 months)

# Model Switch

# MMD by Cohort by Intensity of Model (Most recent 12 months)

# Summary

- DSD DPR – detail beyond routinely reported HF aggregate data
- COVID19 effects on 2020 service provision and data quality
  - VL access,
  - update of registers, etc.
- Routine RoC categorization critical to minimize missed opportunities and inappropriate Model allocation
