

# CQUIN Differentiated MCH Workshop

May 25-27, 2021

## Differentiating HIV services for Pregnant and lactating women

**Evelyne Mtetwa**

Project Coordinator YMM; Africaid Zvandiri

26 May 2021

**HIV Learning Network**

The CQUIN Project for Differentiated Service Delivery

# DSD BUILDING BLOCKS

## WHAT

- Psychosocial support & mental health
- Adherence monitoring & support
- Demand creation

## WHO

- Young Mentor Mothers

## HOW

- Case Management of mother-baby pairs
- Supervision by HCWs and Zvandiri
- Peer-led education and counseling
- Home visits
- Support groups
- mHealth
- Linkage and referrals
- Defaulter tracing

## WHEN

- Daily
- Weekly
- Monthly

## WHERE

- Health facility
- Home
- Community

# Results in 38 sites implementing the project (24 months)

**96% of the young mothers** have undetectable viral loads

**97.6%** of exposed infants are HIV negative  
**2.4% MTCT rate at the end of breastfeeding**

# Successes in Engaging Men (24 months)

- **65%** of YMs reported a partner
- **92%** of male partners tested for HIV (the first time for most)
- **66%** partners identified with previously undiagnosed HIV.
- **99%** partners who tested HIV-positive were initiated on ART
- **98%** who tested HIV-negative subsequently linked to PrEP.
- Improved disclosure by YMs to their partners

# Lessons learned/ Next steps

- Peer-led MTCT interventions are highly effective in preventing vertical transmission of HIV
- Same model improves engagement of male partners for
  - Partner testing
  - PrEP
  - Condom use
  - Improved support for YMs
- Need to continue scaling up the YMM intervention; with emphasis on intervention for partners

*With support we stand strong*
