

Differentiated Service Delivery for Key Populations

August 25-26 and 30-31, 2021

Opening Remarks

Wafaa El-Sadr, MD, MPH, MPA
Professor of Medicine & Epidemiology
Global Director, ICAP at Columbia University
25 August 2021

HIV Learning Network
The CQUIN Project for Differentiated Service Delivery

Outline

- The CQUIN Learning Network
- DSD and Key Populations
- Meeting Objectives and Agenda

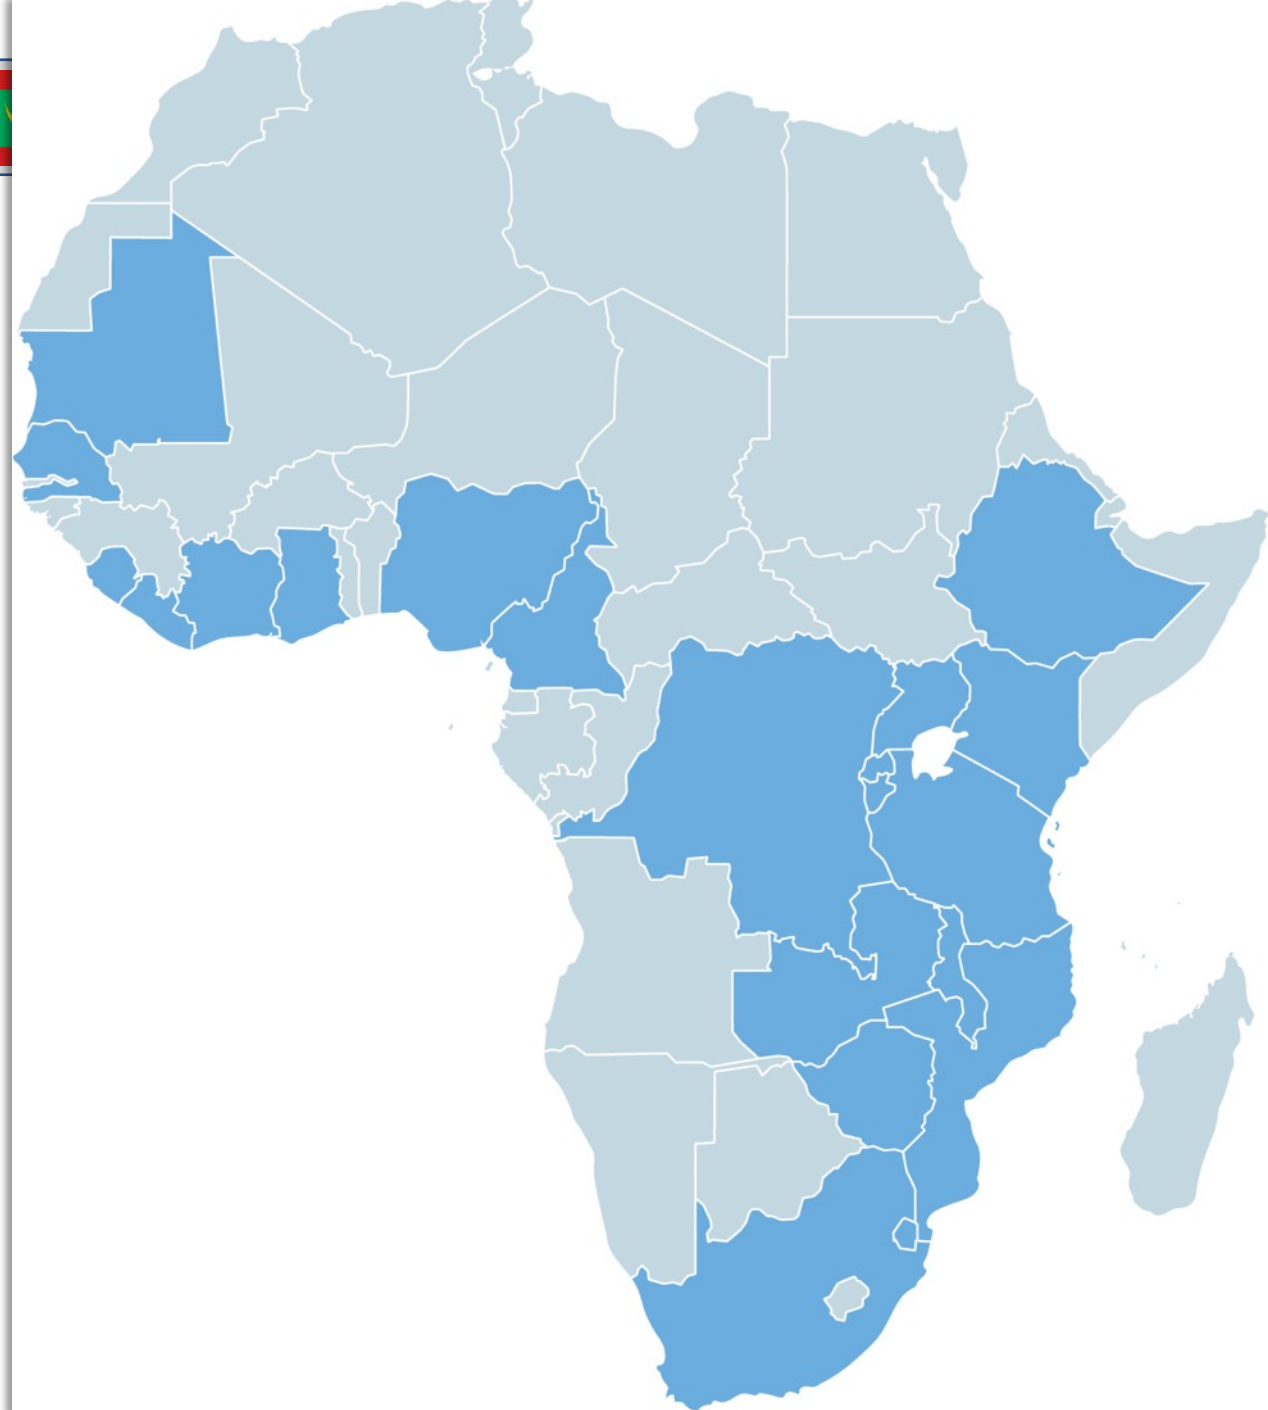

The CQUIN Learning Network

- The **HIV Coverage, Quality, and Impact Network** is a south-to-south learning network designed to accelerate implementation of high-quality differentiated service delivery to enhance patient outcomes, increase health system efficiency and achieve HIV epidemic control
- Funded by the Bill & Melinda Gates Foundation
- Convened/led by ICAP at Columbia University
- Advisory Group inclusive of Ministries of Health, civil society, PEPFAR, CDC, USAID, WHO, Global Fund, UNAIDS, International Treatment Preparedness Coalition (ITPC)
- Supported by a Community Advocacy Network chaired by ITPC
- Focuses on the gap between policy and implementation

21 CQUIN Partner Countries

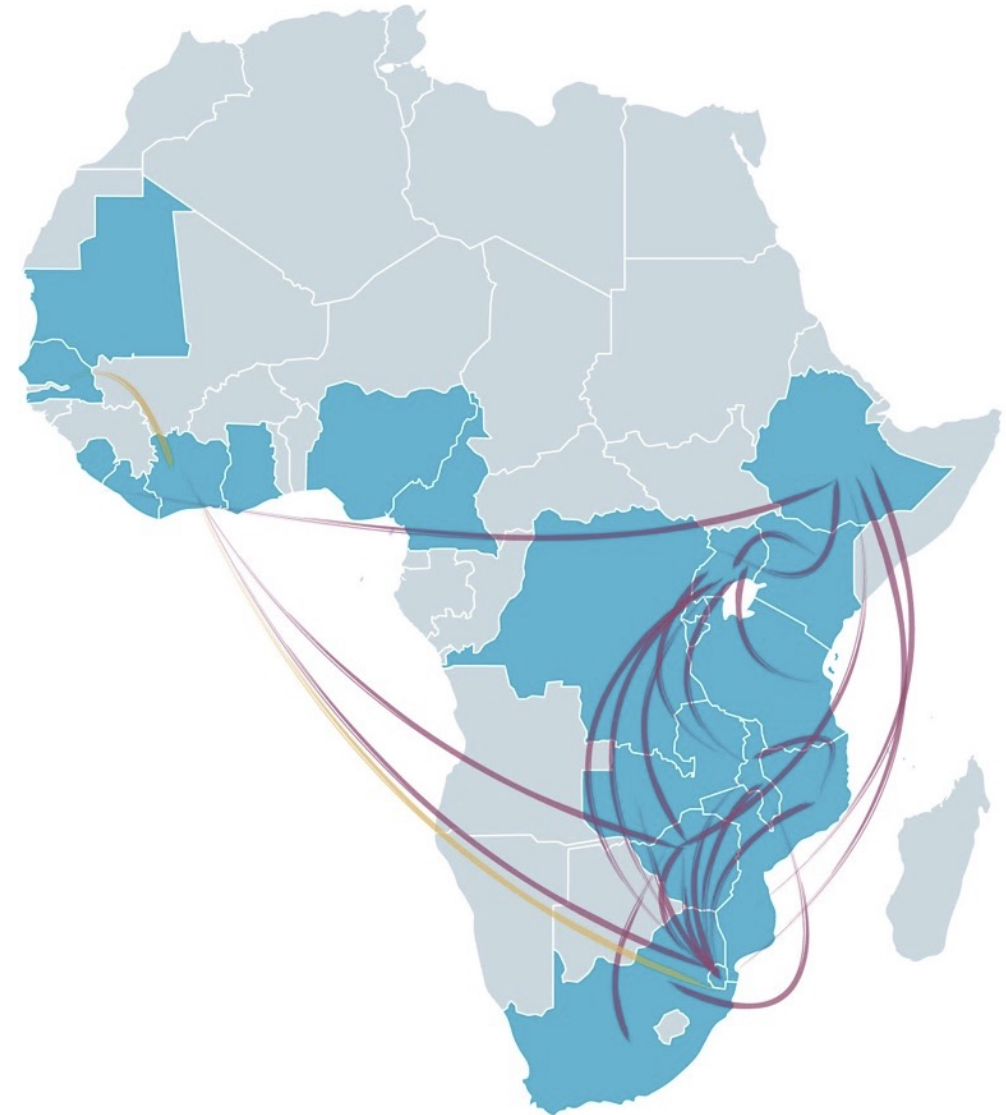

- Burundi
- Cameroon
- CI
- DRC
- Eswatini
- Ethiopia
- Ghana
- Kenya
- Liberia
- Malawi
- Mauritania
- Mozambique
- Nigeria
- Rwanda
- Senegal
- Sierra Leone
- South Africa
- Tanzania
- Uganda
- Zambia
- Zimbabwe

Illustrative CQUIN activities

- **South-to-south learning**
 - Meetings and workshops
 - South-to-south visits
 - Communities of practice
 - Website, webinars, monthly newsletter
- **Focused technical assistance**
 - Seconding national DSD coordinators to MOHs
 - Support for national DSD review meetings
 - ICAP consultation/TA
- **Implementation research**
 - Catalytic projects

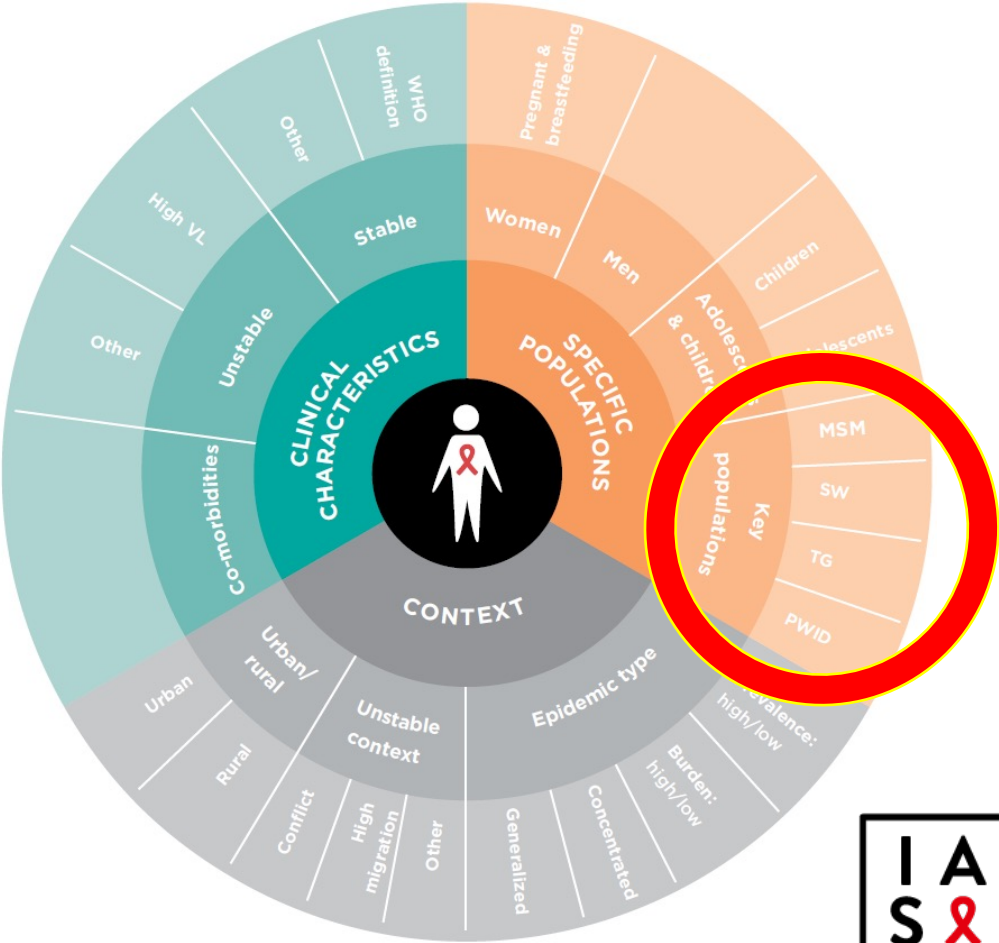

Outline

- The CQUIN Learning Network
- DSD and Key Populations
- Meeting Objectives and Agenda

- Differentiated service delivery tailors the design of HIV programs for different groups in order to meet their needs and expectations and to deliver high quality services
- Optimizing HIV services for diverse key population groups is critical to ensure the coverage, quality and impact of HIV services
- Key strategies include KP-led services, status-neutral care and integrated, holistic service delivery models

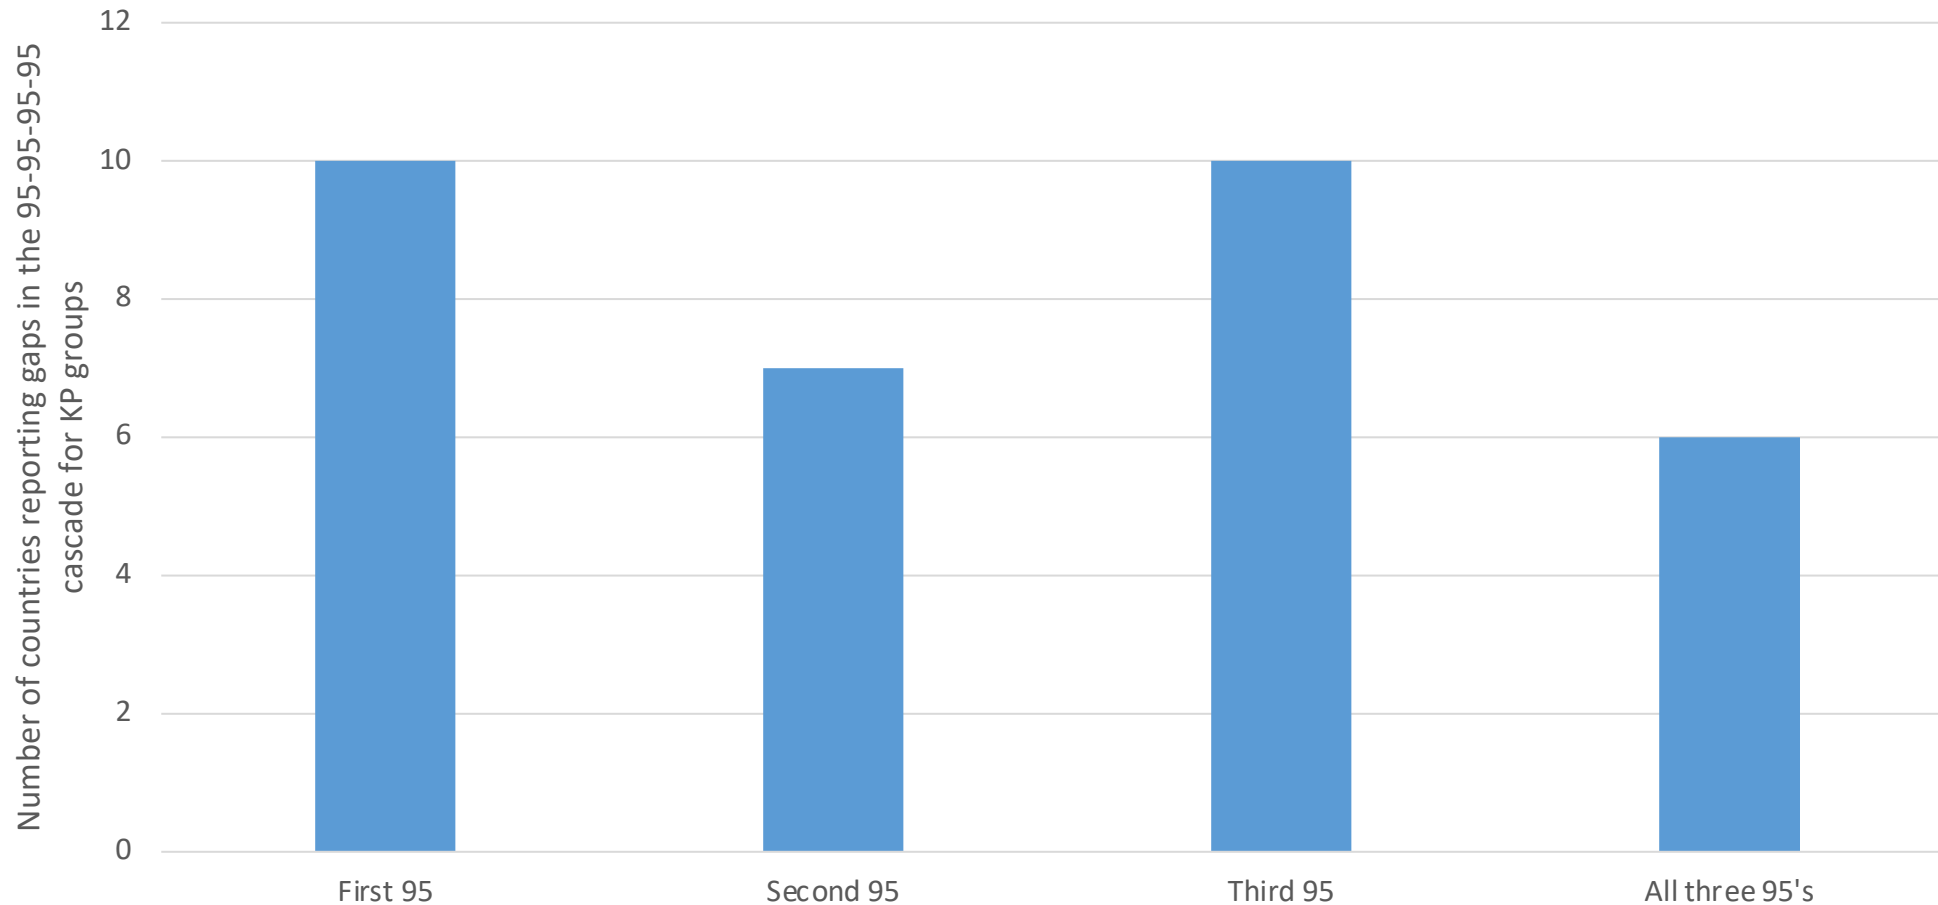

Illustrative pre-meeting needs assessment findings

(N = 15 countries)

Documented gaps in the HIV cascade for KP

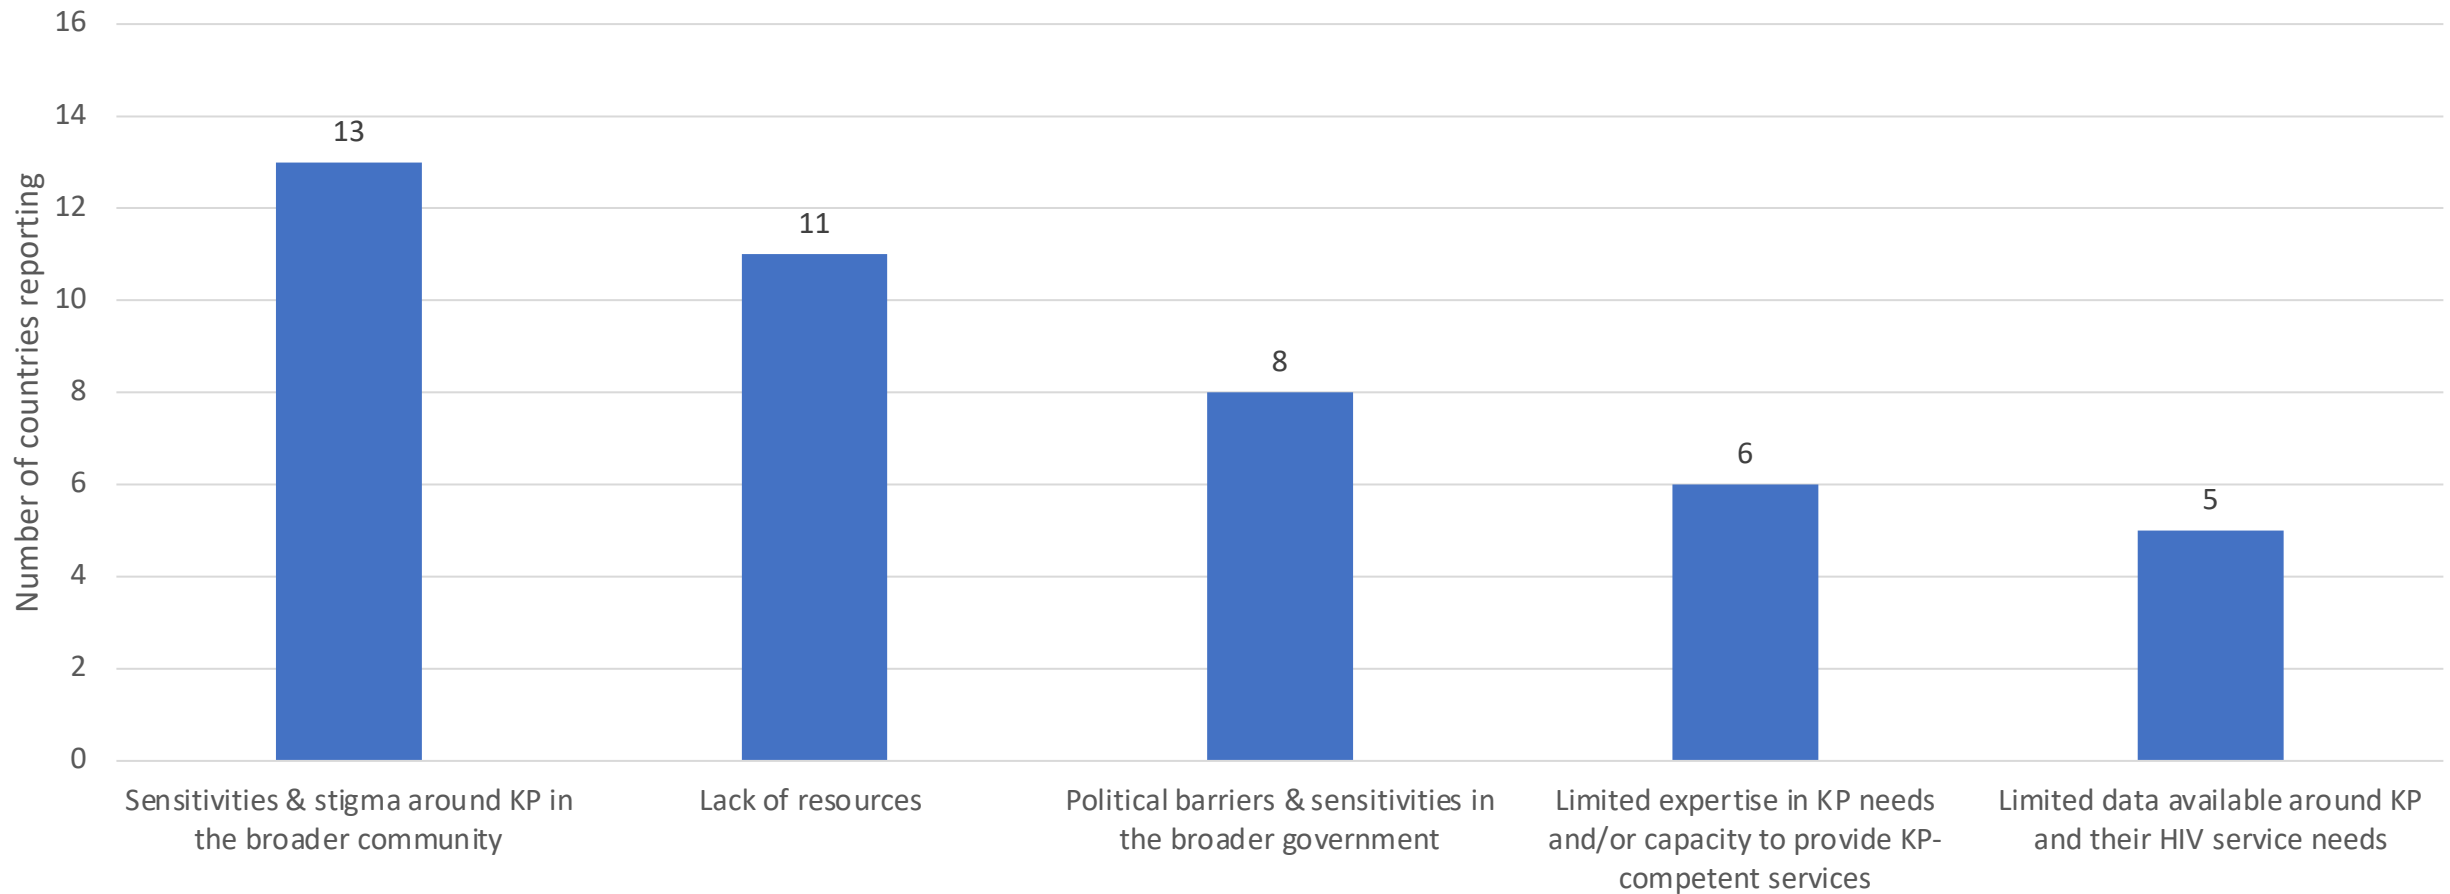

Illustrative pre-meeting needs assessment findings

(N = 15 countries)

Barriers to providing DSD for KP

Illustrative Registration Survey findings

(N=297 respondents)

- HIV prevention, testing, linkage and treatment services for KP are not yet implemented at scale.
- M&E of KP services remains challenging: only 33% of respondents said that KP services are captured by national M&E systems
- 91% of respondents said that hostile legal, social and/ political environments limit KP access to HIV services in their countries

Outline

- The CQUIN Learning Network
- DSD and Key Populations: Making the Connection
- Meeting Objectives and Agenda

Meeting Design

- Meeting design is based on two needs assessment surveys and 40 key informant interviews with a wide range of KP representatives, recipients of care, ministries of health, implementing partners and global experts.
- The meeting is co-convened with the **South-to-South HIV Prevention Learning Network (SSLN)** which is coordinated by Genesis Analytics and the University of Manitoba and includes 10 of the 21 countries in the CQUIN network

Meeting Objectives

- Present basic concepts, conceptual frameworks and global guidance related to differentiated HIV testing/linkage, prevention, and treatment services for KP groups.
- Center the voices and experiences of KP-led organizations and recipients of care.
- Review case studies and best practices related to DSD models for KP across the spectrum of HIV services.
- Collaboratively explore crosscutting barriers and facilitators to DSD for KP
- Discuss strategies for KP program monitoring and evaluation
- Identify common gaps, challenges, and opportunities for future joint-learning, co-creation of tools and resources, and future south-to-south exchange visits.

Collaboration will continue after the workshop, as the two networks support ongoing south-to-south exchange, communities of practice, and joint learning.

Meeting Logistics

- The meeting includes approximately 800 participants, including global experts and teams from 21 countries
- It will take place over four half-days, 25-26 August and 30-31 August 2021
- In countries where it is safe to do so and COVID regulations permit, teams are convening in person to watch the meeting together
- It will be held largely in English with French and Portuguese translation.
- There is an accompanying meeting website with additional resources, slides and videos: www.cquin.icap.columbia.edu

	Wednesday, August 25	Thursday, August 26	Monday, August 30	Tuesday, August 31		
7:00-8:00am NY time	Plenary session: Opening plenary	Plenary session: M&E of KP programs	Plenary session: Enabling environments	Plenary session: Virtual interventions		
8:00 – 8:30 am	Break	Break	Break	Break		
8:30 – 9:30 am	Plenary session: Differentiated HIV prevention for KP	Plenary session: Differentiated HIV testing & linkage for KP	Plenary session: Differentiated HIV care & treatment for KP	Parallel Sessions: Special considerations for specific KP groups		
				TG MSM PWID SW		
9:30 – 10am	Break	Break	Break			
10:00-11am	Parallel Sessions		Parallel Sessions		Break	
	Integrated services case studies	Prevention case studies	M&E of KP programs case studies	Testing & linkage case studies	Enabling environment case studies	Care & treatment case studies

Differentiated Service Delivery to Provide High-Quality HIV Services to Key Populations

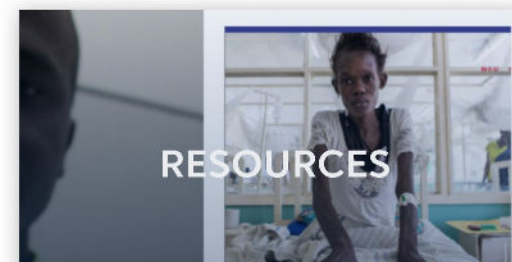

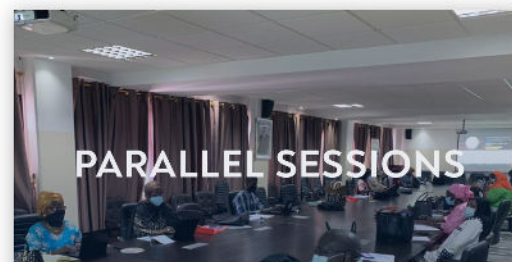

Dates: August 25 – 26, and 30 – 31, 2021

- Conference Home
- Agenda
- Parallel Sessions
- Resources

CQUIN in collaboration with the [South-South HIV Prevention Learning Network \(SSLN\)](#) will hold a virtual meeting focused on DSD for key populations (KP), with the goal of sharing current science and guidance; catalyzing the exchange of best practices; and supporting partner countries to improve the quality and coverage of HIV services for sex workers, men who have sex with men, transgender people and persons who inject drugs.
