

# CQUIN 5<sup>th</sup> Annual Meeting

Virtual: November 16-19, 2021

Session 8c: Country Updates from Cameroon and Rwanda

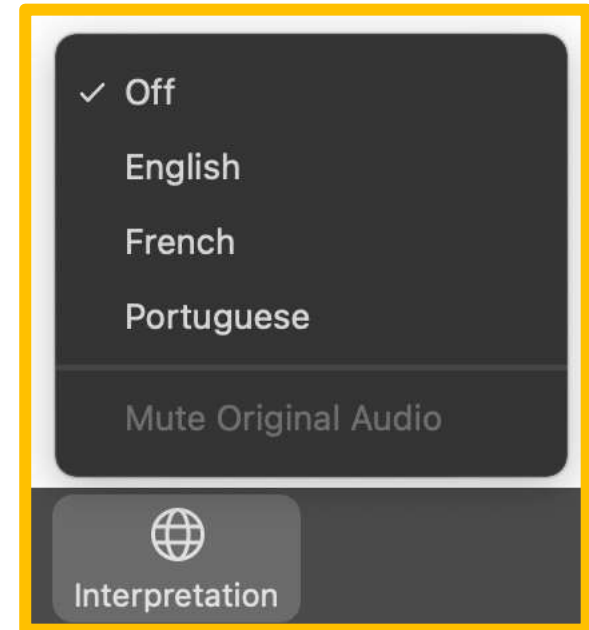

Thursday, November 18, 2021

HIV Learning Network  
The CQUIN Project for Differentiated Service Delivery

# Welcome/Bienvenue/Bem-vindos

- Be sure you have selected the language of your choice using the “Interpretation” menu on the bottom of your screen.
- Assurez-vous d’avoir sélectionné la langue de votre choix à l’aide du menu <<Interprétation>> en bas de votre écran Zoom.
- Certifique-se de ter selecionado o idioma à sua escolha usando o menu de interpretação na parte inferior do seu ecrã

# Moderators

Tom Minor  
Senior HIV/AIDS Treatment Advisor  
USAID Washington

Veronicah Mugisha  
Country Director  
ICAP in Rwanda

# Framing Remarks

Rachel Mudekereza  
CQUIN Regional Clinical Advisor  
ICAP Côte d'Ivoire

# Updates from Country Updates from Cameroon and Rwanda Framing Remarks

Rachel Mudekereza; MD- MPH

ICAP Cotes d'Ivoire 18 November 2021

# Outline

- Introduction
- Cameroon
- Rwanda
- Summary

# Introduction

- The 5<sup>th</sup> annual meeting will highlight progress update from 20 member countries who are at different stages of DSD scale-up
- Duration of network countries in CQUIN ranges from 1yr to 5 years
- The different context, strengths, challenges, and resources of network countries provide the perfect environment for learning exchange
- The CQUIN Annual Meeting is an opportunity to share lessons learned and describe change over time
- Each year, country teams complete a standardized online questionnaire which informs our description of their “model mix” and contributes to the CQUIN dashboard

# DART Model Mix

- CQUIN uses a systematic approach to describe differentiated ART (DART) models
- This enables us to compare DSD across programs and countries
- We consider everyone on ART to be in a differentiated model, including those in “conventional” and more-intensive models
- We categorize less-intensive models for people doing well on ART by location (facility vs. community) and by individual vs. group design

	Individual Models	Group Models
Facility-based	Fast Track ART Refills Appointment Spacing Multi-month Scripting Multi-month Dispensing	Facility-based clubs Facility-based teen clubs
Community-based	Community drug distribution Community ART initiation Mobile outreach Private pharmacies Pick-up points, lockers	Community ART Groups (CAGs) <ul style="list-style-type: none"> <li>- Peer-led</li> <li>- HCW-led</li> </ul>

# DART Model Mix, continued

More-Intensive Models	
	Conventional Model
	Other more-intensive models
Less-Intensive Models	
FBI	Appointment Spacing (no fast track)
	Appointment Spacing + Fast Track
	Other FBI
FBG	ART Clubs
	Facility-Based Teen Clubs
	Other FBG
CBI	Outreach
	Community Drug Distribution
	Other CBI
CBG	Community ART Groups (peer-led)
	Community ART Groups (HCW-led)
	Family Model
	Community-Based Teen Clubs (HCW-led)

- CQUIN nomenclature includes the conventional model as a type of more-intensive model
- Less-intensive models sub-divided into categories
  - **Facility-Based Individual (FBI)**
  - **Facility-Based Group (FBG)**
  - **Community-Based Individual (CBI)**
  - **Community-Based Group (CBG)**
- All models can be further defined by quantity of ART provided (e.g., 3- or 6-month drug distribution) as applicable.

# Introduction: DSD Program Maturity

The **CQUIN Dashboard** is another way to systematically describe a country's differentiated treatment program

- Uses a capability maturity model
- Includes 13 domains representing necessary components for implementing differentiated ART (DART) services at scale
- Uses 5 stages of maturity represented by a color scale
- Multi-stakeholder country teams stage the country program
  - an internal, consultative activity, not an external evaluation

# The CQUIN Dashboard

Community Engagement						
Training						
SOPs/Job Aids						
M&E System						
Facility Coverage						
Patient Coverage						
Quality						
Impact						

# Cameroon: Model Mix

# Cameroon: quantity of ART distributed - MMD

# Cameroon: Selected Achievements

- National Coordination of DSD involving all stakeholders.
- Improved community engagement
- Defined standards of Quality for DSD

# Cameroon : Selected Challenges

- DSD models Implementation not standardized in all regions
- Issues with supply chain of ARV commodities, affecting MMD
- DATA availability at non-supported sites

# Cameroon : Selected Goals and Targets for 2022

- Increase proportion of people in less-intensive differentiated treatment models to 50%
- Development of Operational Guide, Development of DSD data collection tools and integration into national M&E system
- Expand differentiated treatment model mix to include AHD, MCH, Mobile and migrant population

\*Reflects overall coverage during 2017-18(I)

# Rwanda : Model Mix

# Rwanda : Quantity of ART distributed - MMD

# Rwanda : Selected Achievements

- DSD scaled up to more health facilities
- Improvement in diversity of differentiated treatment models
  - Added more community-based models, including peer-led models
  - 3MMD, Adolescent DSD, key populations (KP) friendly service, DSD for maternal and child-care (MCH)
- Improved dashboard domain results in M&E and Patient Coverage
- Close follow up of service continuity during COVID-19
- Endorsement of concept note for AHD & Adolescent DSD models.
- Conducted DSD-specific joint supportive supervision & review meeting

# Rwanda : Selected Challenges

- Inability to conduct ASM evaluation due to lack of funding
- Supplies for AHD (CD4, CrAg, fluconazole) - need to be secured
- Incompleteness of reports through national M&E systems - using parallel data collection for new models
- Data tracking problem with 3MMD for pregnant and breastfeeding women

# Rwanda : Selected Goals and Targets for 2022

- Increase the percentage of established people in less-intensive differentiated treatment models to 90%
- Expand existing models: Community based ART Refill model (HEP\_CAG, PCAD), AHD, Adolescent DSD model and KP friendly services.
- Expand and strengthen point of care (POC) early infant diagnosis testing.
- Expand and strengthen POC Viral load testing

# In Summary...

## Shared achievements:

- Updating guidelines in improve differentiated treatment services
- Expanded MMD during COVID-19 to ensure continuity of care

## Shared challenges:

## Shared 2022 Goals:

- Increase coverage of people in less-intensive differentiated treatment models
- Expand diversity of models to increase access to different populations

# Panelists/Panélistes/Painelistas

**Boubou Haman Joelle N.**  
Assistant Director  
MOH Cameroon

**Edith Temgoua**  
TB/HIV Technical expert  
NACC Cameroon

**Pauline Mountom**  
AFASO Cameroon

**Magdalene Mayer**  
Public Health Specialist  
CDC Cameroon

**Gallican N. Rwibasira**  
Division Manager for HIV, STIs,  
viral Hepatitis and other viral  
disease control  
MOH Rwanda

**Sage Semafera**  
Executive Secretary  
RPP+ Rwanda

**Andrew Gasozi Ntwali**  
Community Support Advisor  
UNAIDS Rwanda

# CQUIN 5<sup>th</sup> Annual Meeting

Virtual: November 16-19, 2021

Session 9 Parallel Sessions starts at 10am EST/3pm West Africa/4pm Geneva/5pm Pretoria/6pm Nairobi

HIV Learning Network  
The CQUIN Project for Differentiated Service Delivery
