

# Mozambique

## CQUIN 5<sup>th</sup> Annual Meeting

Hélder Macul  
MD, MOH, National STI, HIV/AIDS Control Program  
November 18, 2021

# Outline

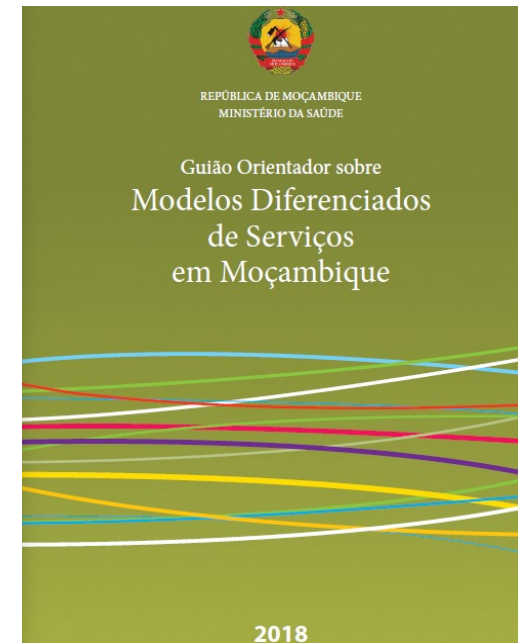

- **Where are we now?**
  - CQUIN Dashboard Results
  - DART Model Mix
- **How did we get here?**
  - Update on CQUIN Action Plan
  - COVID19 specific adaptations
  - Successes and Challenges
- **2022 goals and targets**

# Context

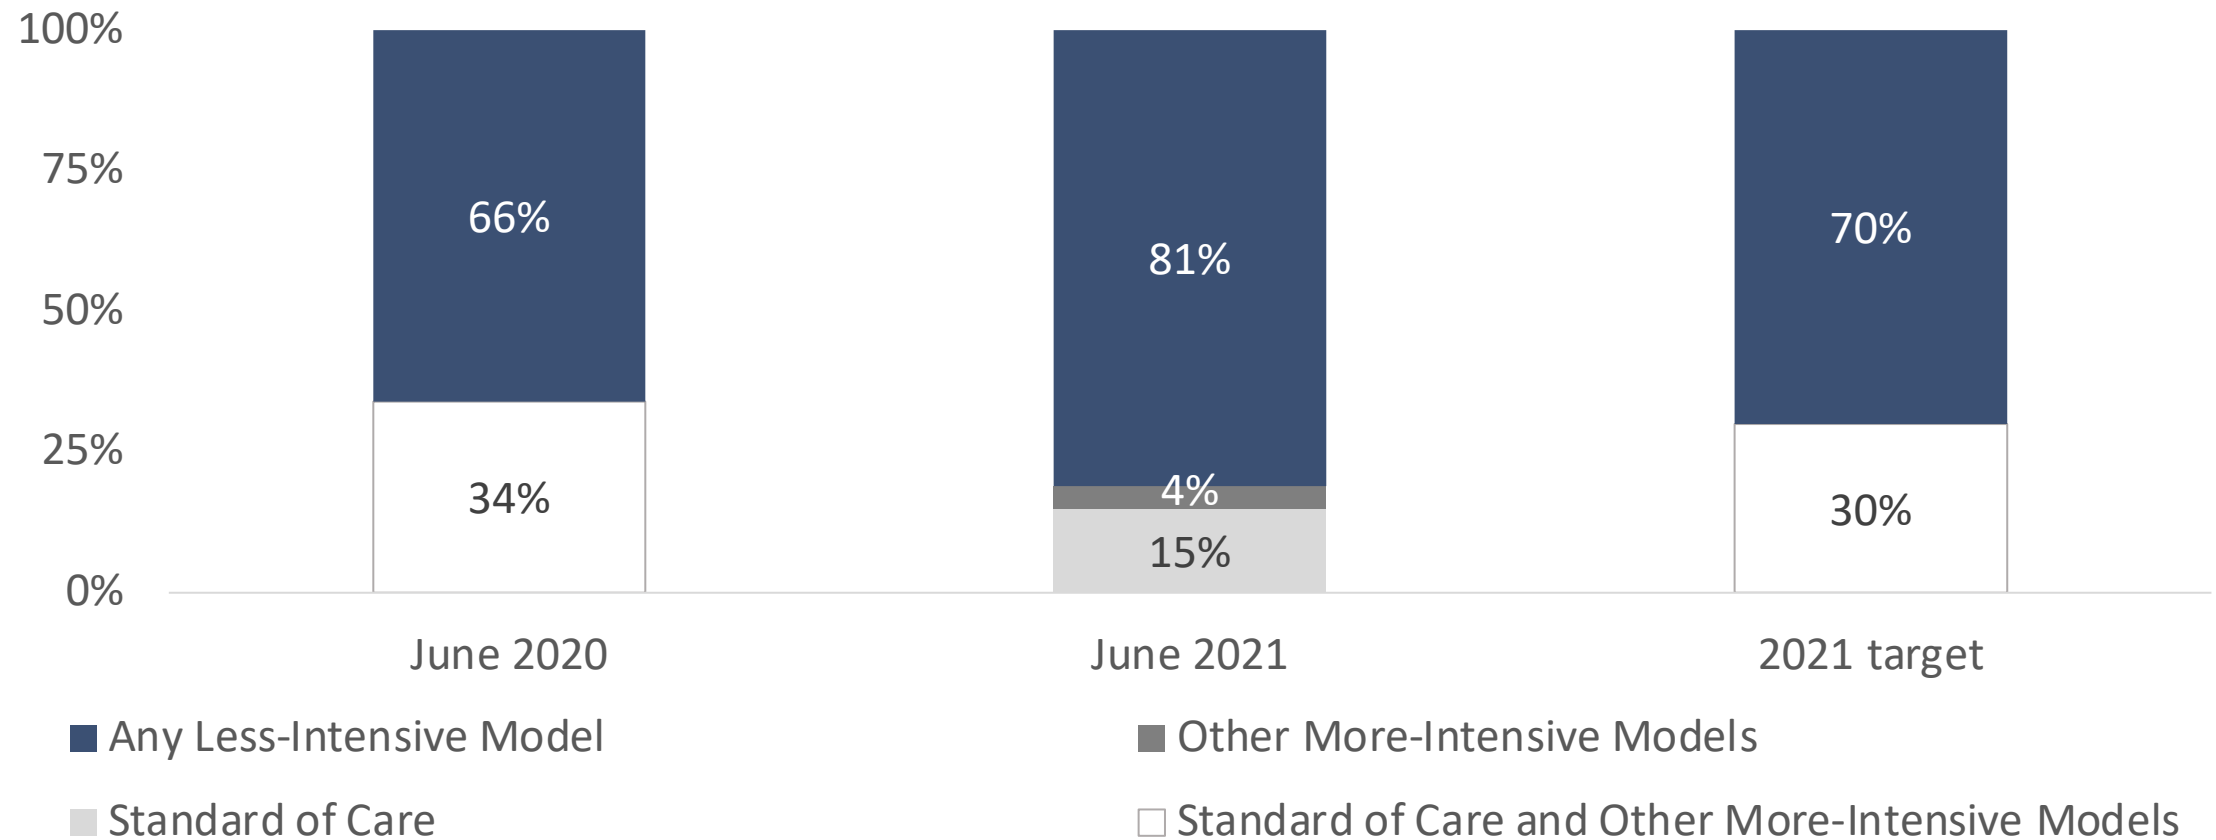

The country continues facing some challenges in providing HIV services:

- Long distances to access health services;
- Low adherence due to the need for frequent visits to the HF;
- Provider's work overload;

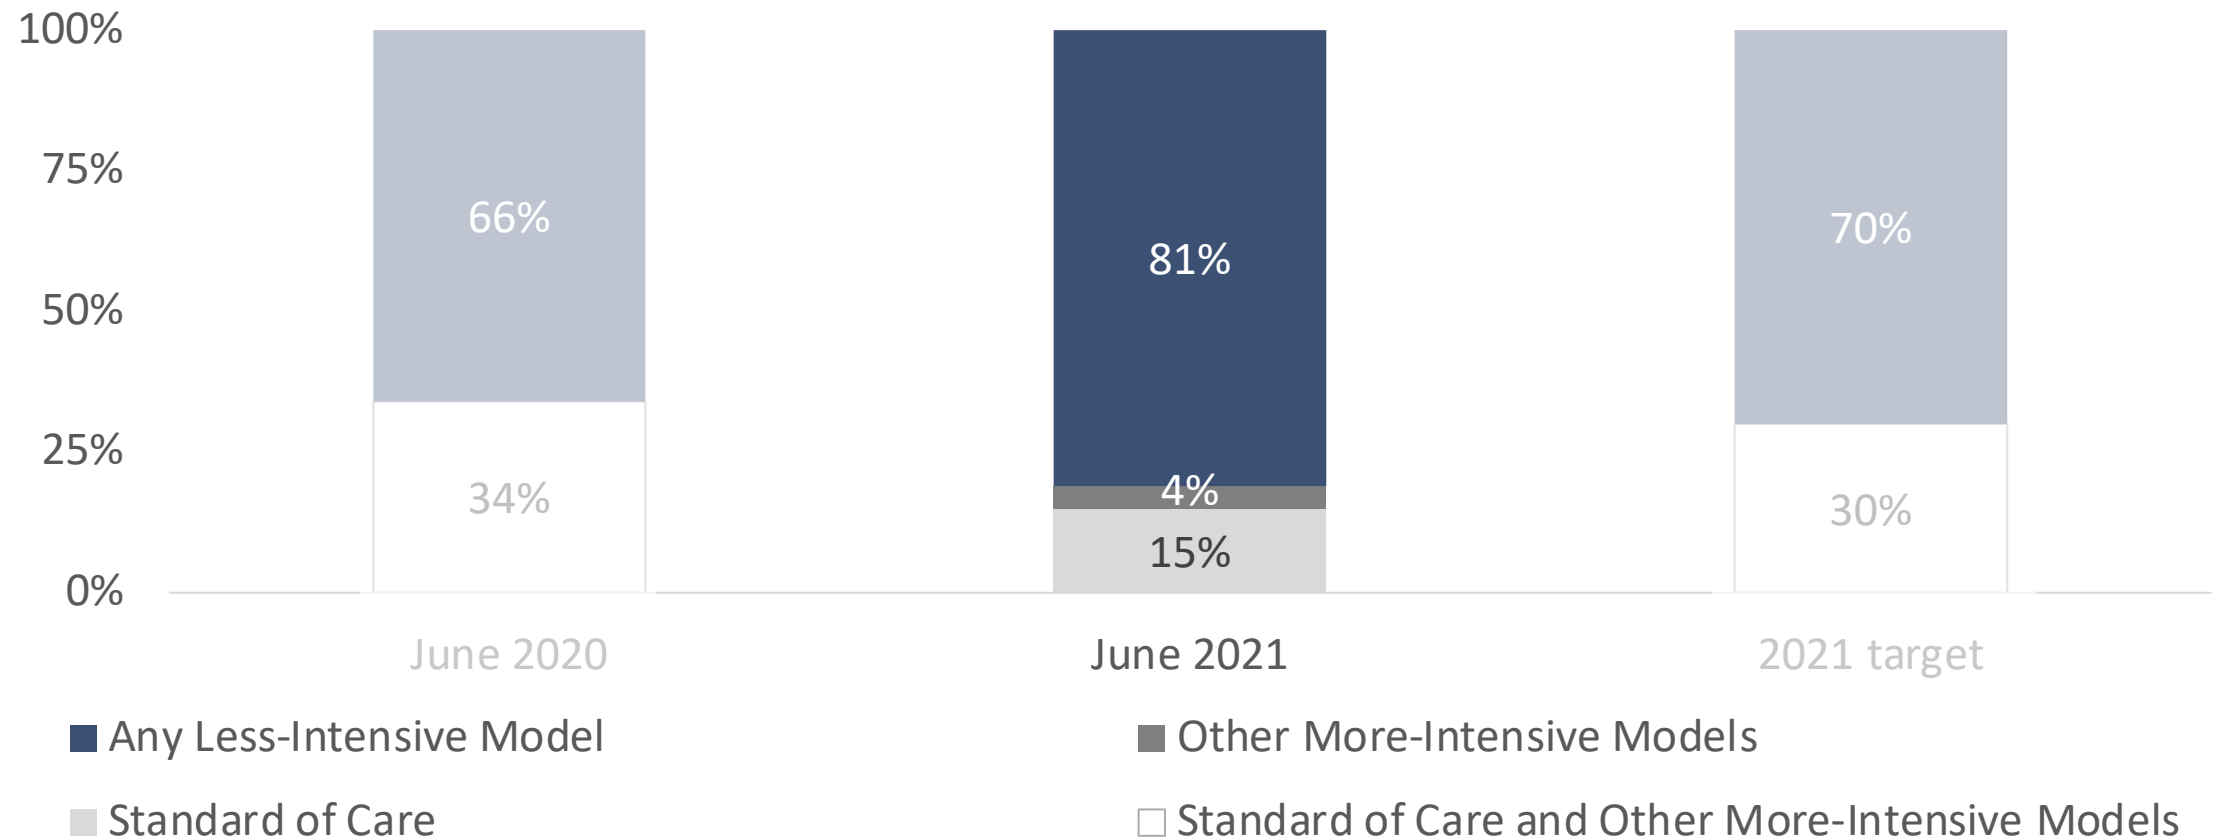

As part of the response to these challenges, in 2018, MOH developed and started implementation of the National DSD Guide

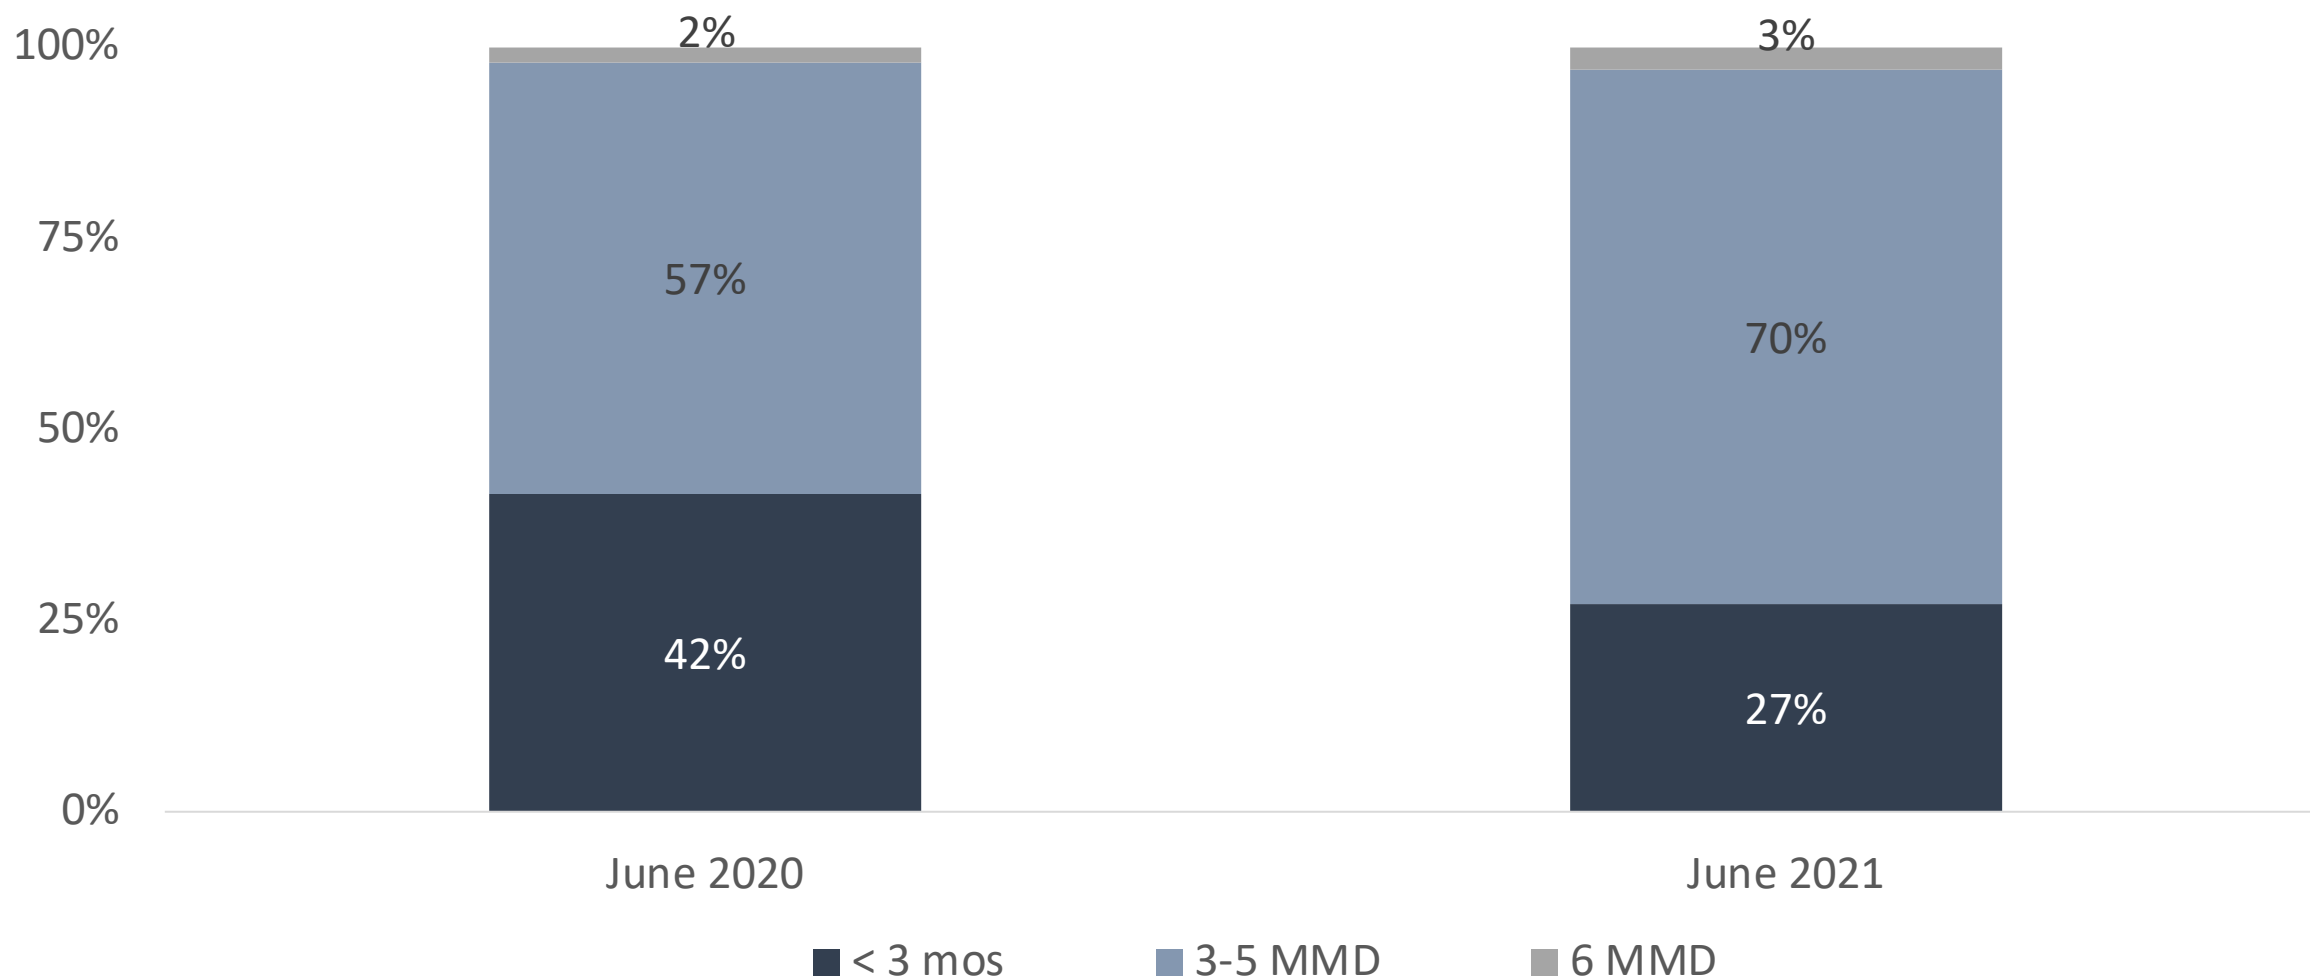

# Mozambique – model mix, June 2020-21 results vs. 2021 targets

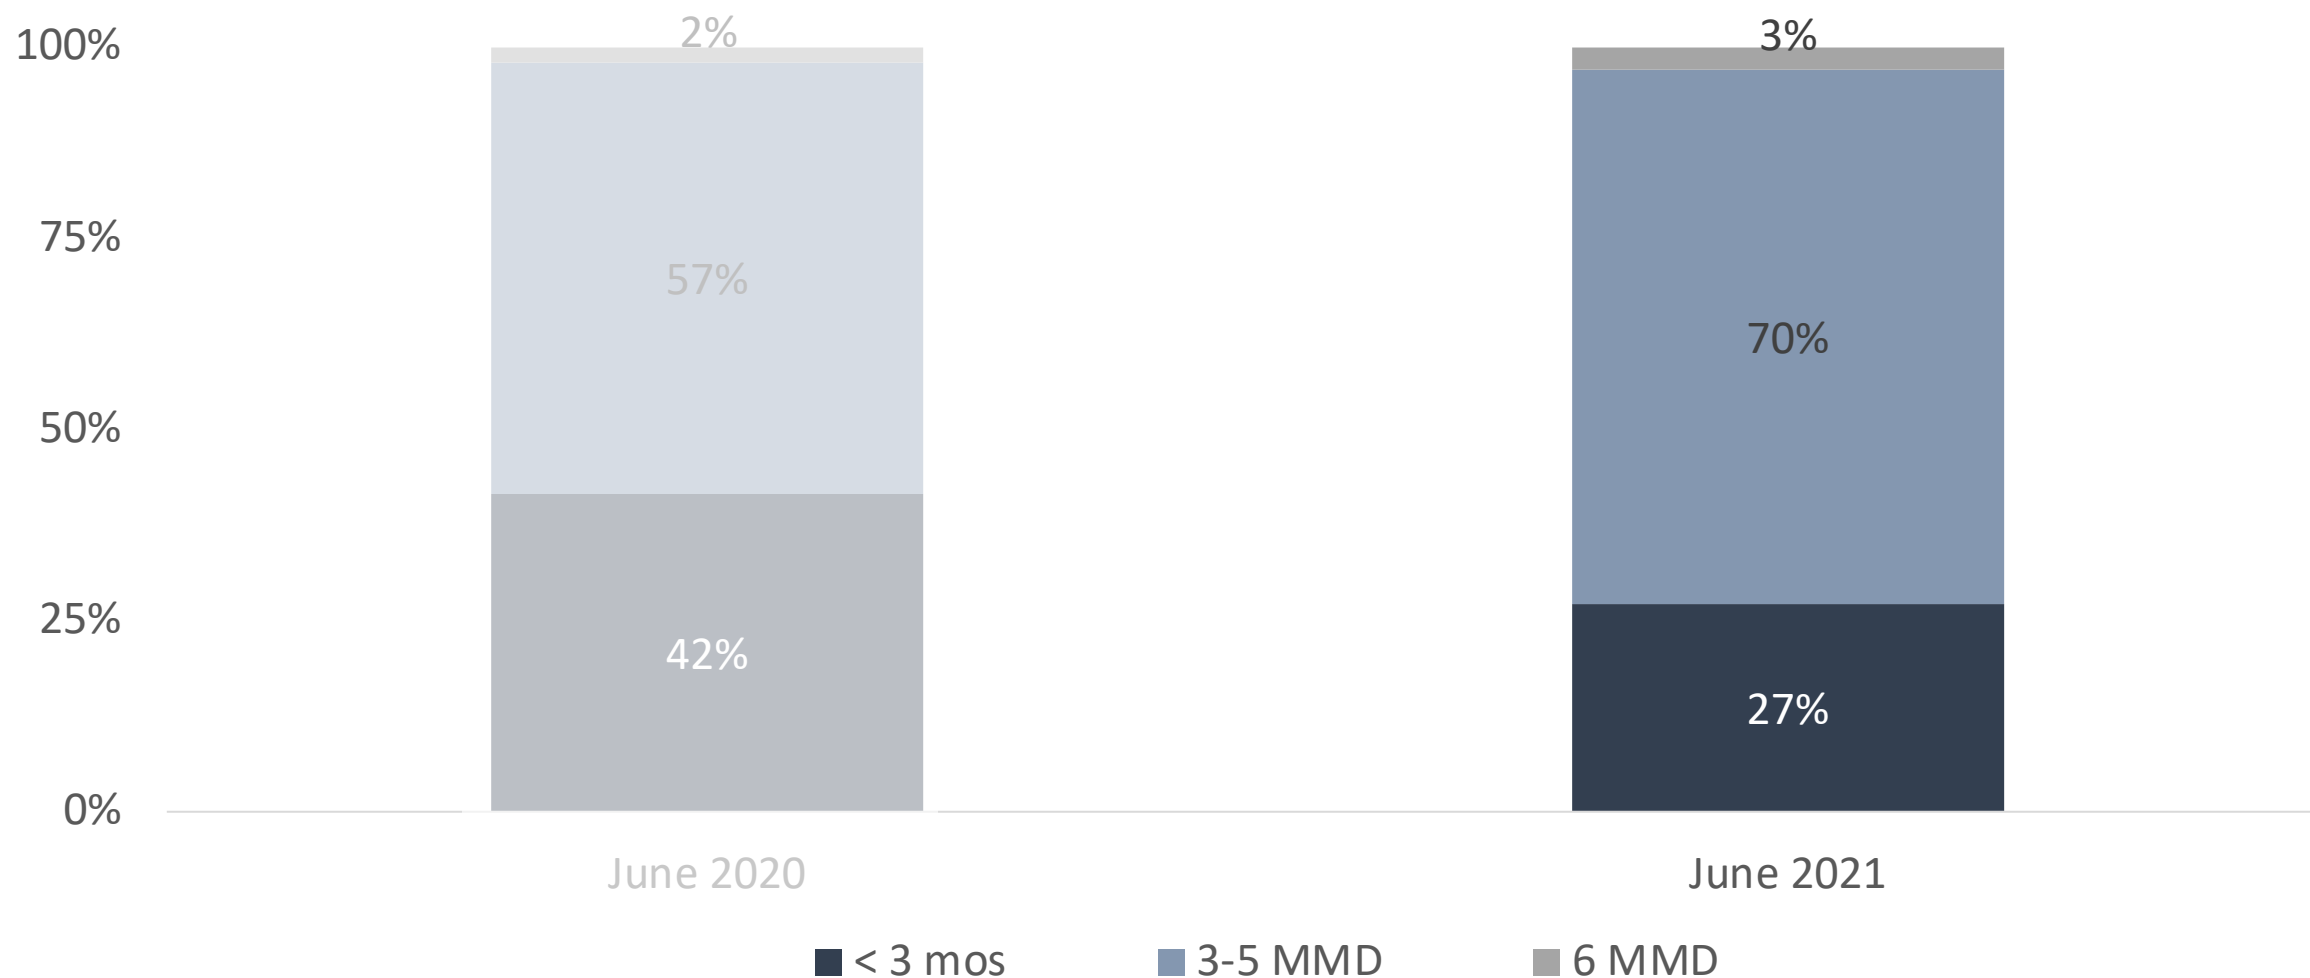

# Mozambique – model mix, June 2020-21 results vs. 2021 targets

# Mozambique – quantity of ART distributed: June 2020-21 results

# Mozambique – quantity of ART distributed: June 2020-21 results

Domain	2021
Patient Coverage 1: Testing of people to identify AHD	Orange
Patient Coverage 2: Screening of people with advanced immunosuppression for prevalent OI/ comorbidities	Orange
Patient Coverage 3: Prevention of OI/ comorbidities amongst people with advanced immunosuppression	Dark Green
Patient Coverage 4: Management of opportunistic infections/ comorbidities	Dark Green
Supply Chain Management for AHD Commodities	Yellow
M&E System	Light Green
Quality of AHD Services	Yellow
Impact of AHD Services	Red

# Outline

- Where are we now?
  - CQUIN Dashboard Results
  - DART Model Mix
- How did we get here?
  - Update on CQUIN Action Plan
  - COVID19 specific adaptations
  - Successes and Challenges
- 2022 goals and targets

# Update on CQUIN Action Plan

- **Activities that have been successfully completed include:**
  - Outcome data measurement in the National QI strategy
  - Conduct DSD data performance review
- **One or two activities that were dropped or are still underway include:**
  - Update of the National Viral Load Algorithm (being finalized by the TWG)

# Items Added to the Action Plan Mid-Year

## After The Differentiated MNCH Meeting In May 2021:

- Integrate FP methods in care and treatment clinical consultations for non pregnant HIV positive women at HF
- Implement multi-month drug dispensation for pregnant women in emergency context
- Strengthen the multi-month drug dispensation for BFW
- Integrate VL processing in point of care (POC) existing platforms at facility level (M-Pima and Gene Xpert)
- Create electronic file (on EPTS) to capture information regarding clinical follow-up of exposed child/mom-bay pair until the end of the PMTCT cascade
- Include the integrated FP components in the National QI strategy/cycles

# Items Added to the Action Plan Mid-Year - 2

## **After The Differentiated KP Services Meeting:**

- Strengthening/scale up of networking for key populations
- Use of digital platforms for demand creation
- Implementation of “safe spaces” and provide testing and linkage services
- Implementation of self testing services for MSM, FSW and Prisoners
- Implementation of Mobile Clinics for key population services

# COVID-specific adaptations

- **Policies adapted in response to COVID19**
  - Scale up of 3MMD at all health facilities (depending on stock availability)
  - Roll out of one stop model at clinical cabinet
  - Updated eligibility criteria for 3MMD enrolment
  - Inclusion of 3MMD for pregnant women and breastfeeding women (specific cases)
  - Roll out of Community Drug Dispensation
- **Adaptations that will be sustained beyond COVID19**
  - Scale up of 3MMD for all health facilities (depending on stock availability)
  - Roll out of one stop model at clinical cabinet
  - Updated eligibility criteria for 3MMD enrolment

# Successes

- Roll out/scale up of new DSD in the country
  - Community ART Dispensation
  - One stop Model at clinical cabinet
  - Extended hours
- DSD Performance Review
  - Assessment of Coverage, Quality, impact and Patient/Provider perception
  - DPR Dissemination Meeting

# Successes - 2

# Challenges (other than COVID-19)

- Registration tools only allow registration/reporting of one or two models per patient;
- Health facilities without EMR are not able to report DSD data;
- Quality of services provided to patients on DSD;
- Availability of AHD commodities for implementation of AHD package.

# Outline

- Where are we now?
  - CQUIN Dashboard Results
  - DART Model Mix
- How did we get here?
  - Update on CQUIN Action Plan
  - COVID19 specific adaptations
  - Successes and Challenges
- **2022 goals and targets**

# 2022 Goals and Targets – 1

## **By CQUIN's next annual meeting (end-2022):**

- 85% of people on ART will be in less-intensive DSD treatment models
- Plans for model mix – Gradual scale up of 6MMD

# 2022 Goals and Targets – 2

- Scale up Self Test and Dual Test (HIV/Syphilis)
- Train Providers and scale up AHD package to 26 health facilities
- Implement 3MMD for pregnant women and breastfeeding women in emergency settings
- 2<sup>nd</sup> DSD Performance Review

# 2022 Goals and Targets - 3

What is the one *most important* DSD-related goal or target in your country's plans for 2022?

UPDATE THE NATIONAL DSD GUIDELINE
