CQUIN 6th Annual Meeting

December 6 – 9, 2022 | Durban, South Africa

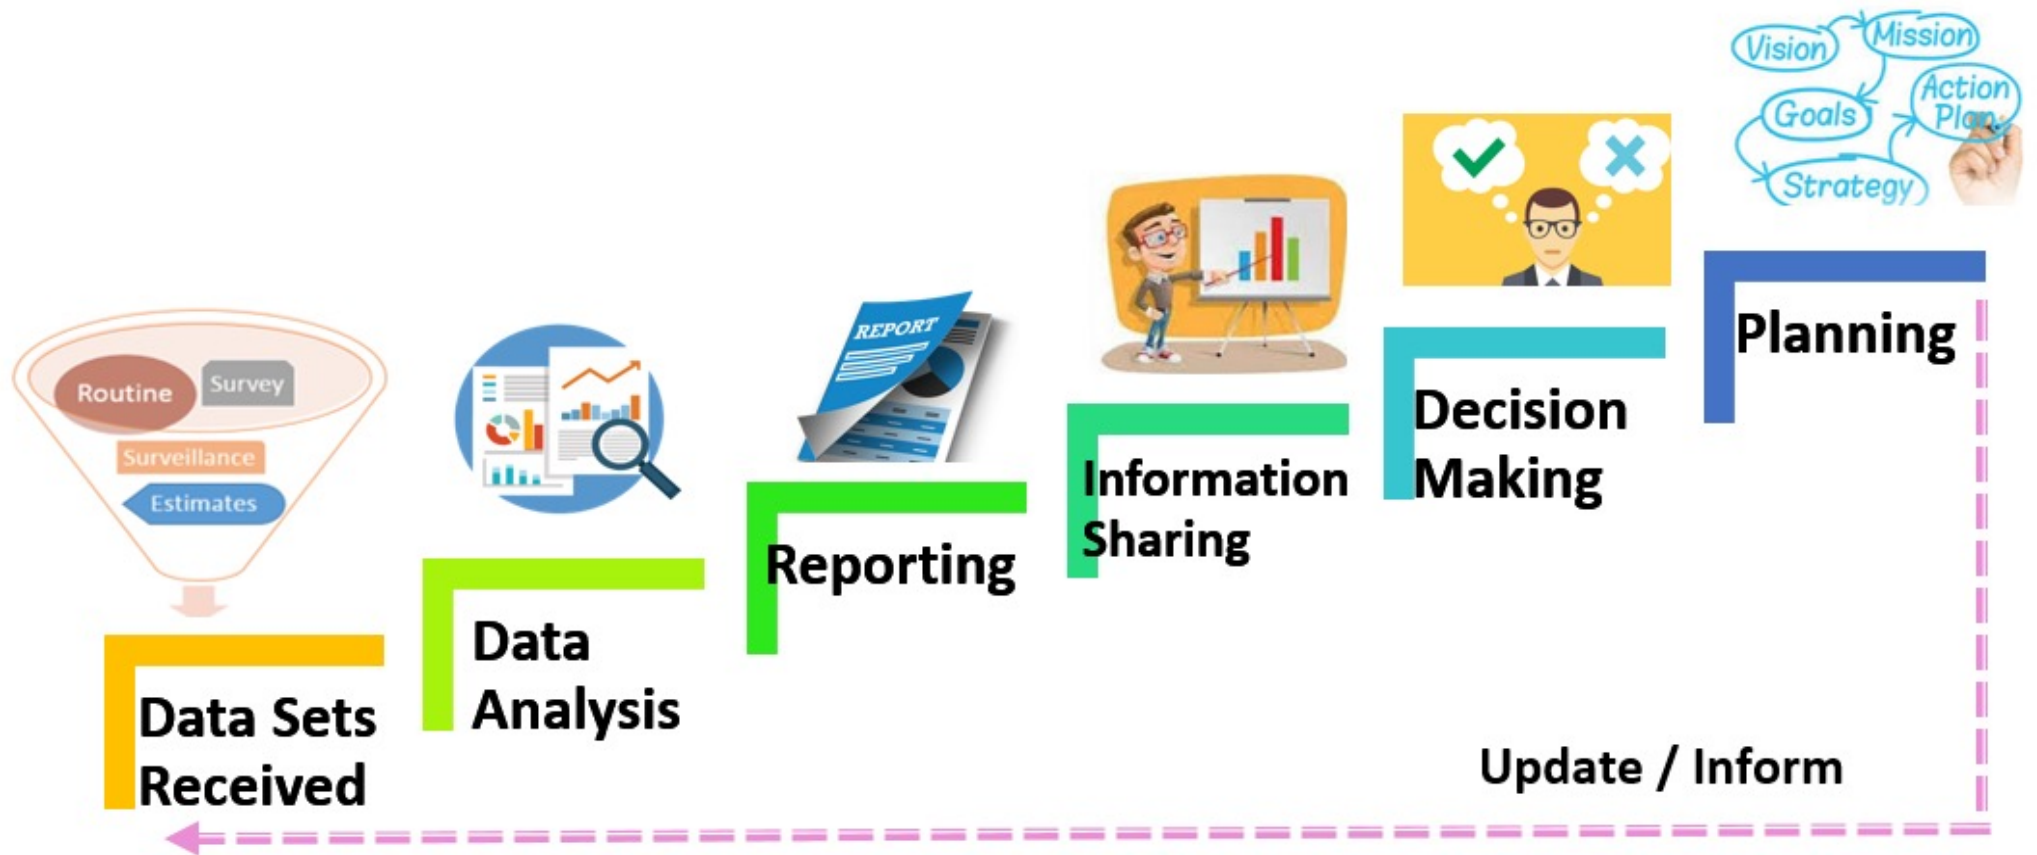

Outline

- Introduction
 - Differentiated Services Delivery in Eswatini
- Reporting & Monitoring Systems of Eswatini
 - M&E processes
 - Current data flow
 - Proposed data flow
- Use of paper-based and electronic systems (CMIS)
- Visualization of Eswatini DSD data on DHIS 2
- What is next?

INTRODUCTION- DSD IN ESWATINI

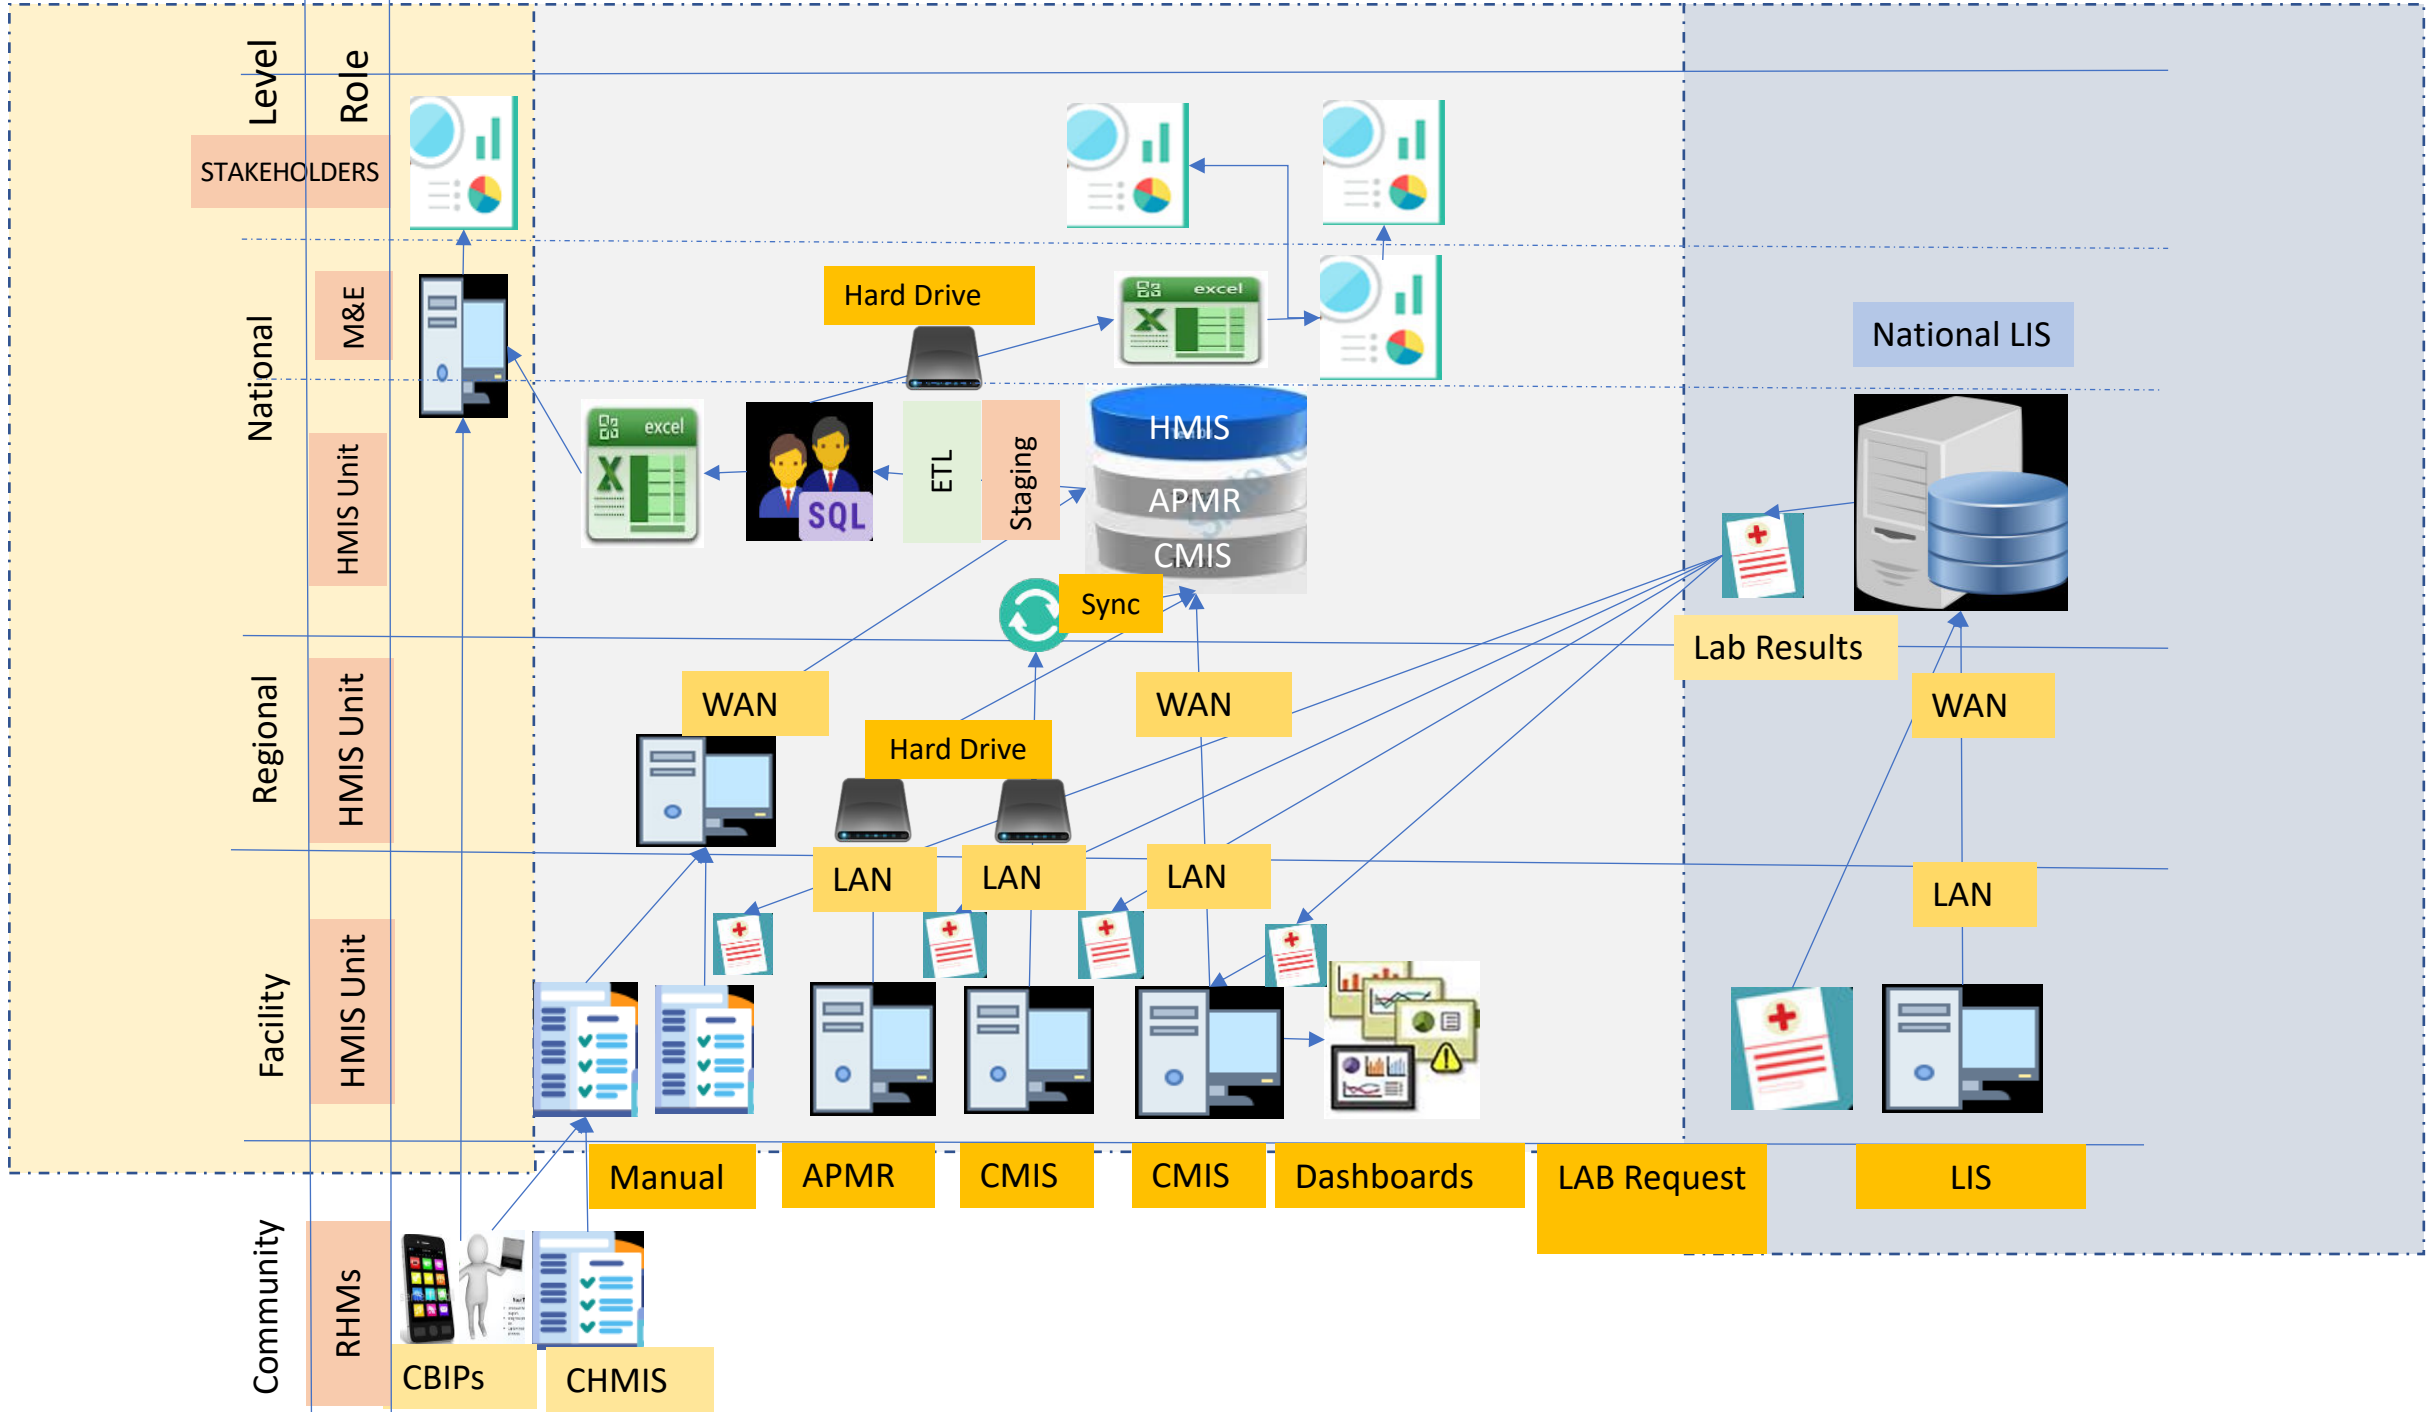

- The increased number of PLHIV on ART in Eswatini due to change in eligibility criteria for ART initiation, resulted in the need to introduce Differentiated Services Delivery (DSD) models.
 - PLHIV on ART increased from 177,156 in 2018 to 207,513 (Sep. '22)
- To reduce client waiting time, the burden on clinicians due to long queues and maintain quality standard of care, DSD models were introduced.
- In Eswatini, DSD was first introduced in 2014, and in 2017 when the support through CQUIN began.
- As of June 2022, more than 70% of PLHIV on ART were on an appointment spacing either with (31%) or without fast-track (41%).

ELECTRONIC SYSTEM _ CLIENT MANAGEMENT INFORMATION SYSTEM

TRAINING

CMIS

Version 2.14.0 [Release Details](#)

Client Management Information System (CMIS) facilitates efficient collection of high quality data to inform appropriate health care service provision, management of clients, and M&E functions at all the different levels of health system. It is intended to replace the paper registers at Ministry of Health facilities to improve data quality and utilization for clinicians, public health programmers and policy makers.

CMIS_ DOCUMENTATION OF DSD/ART CARE MODELS

The screenshot displays a user profile page with a dropdown menu open for the 'Care model' field. The dropdown menu lists the following options:

- Select
- 3 months
- 6 Multi-Month
- Challenge/high viraemic clinics
- Community ART Distribution
- Community Art Group (CAG's)**
- Early morning fast track
- Elderly treatment clubs
- Facility based Treatment Clubs
- Family centered model
- FastTrack
- Mainstream
- Mother baby clubs
- NCD treatment groups
- Outreach
- Teen Clubs

The background shows a profile form with fields for 'ART start date', 'ART Regimen', 'ART Line Regimen', and 'Care model'. The footer includes the Data.FI logo, a 'TRAINING' banner, and contact information: 'Toll Free Help Line: 800 600 5' and 'Logged in user: Tester Data'.

HOW IS DATA EXPORTED TO DSD DASHBOARD ON DHIS 2

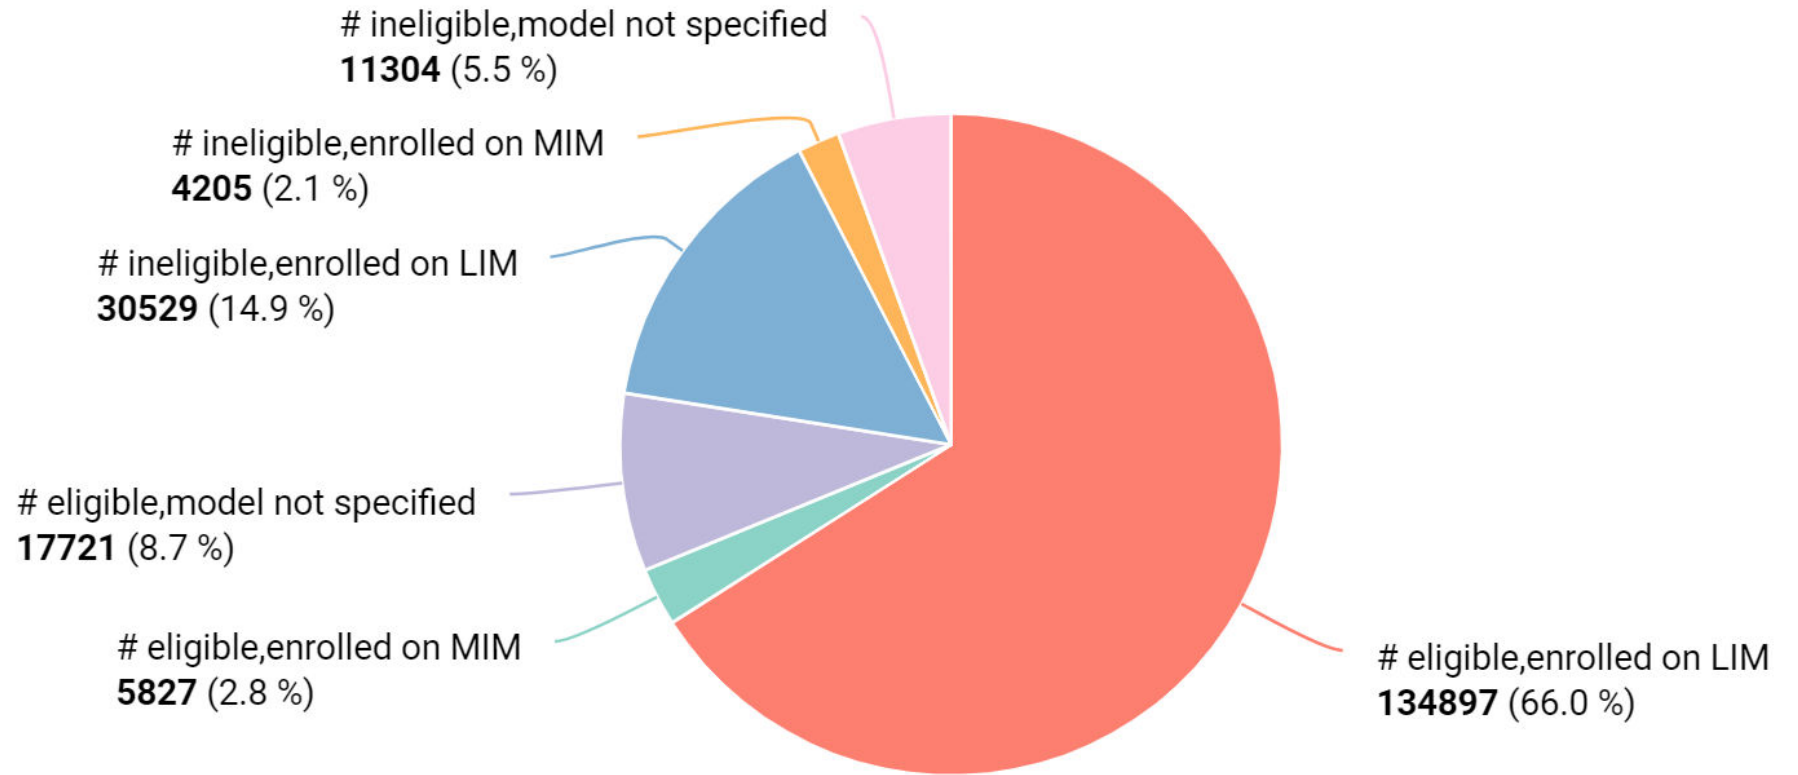

- Initially only data from CMIS supported health facilities was used for visualization thus only providing ~ 80% of national picture
- As of 2022, consolidated dataset with CMIS, APMR, Paper-based etc. Is used which provides entire national performance (with some limitations).
- Indicators visualised include but not limited to ;
 - DSD enrolment by category / type
 - Eligibility by DSD model
 - PLHIV on ART at reporting period
 - VL coverage among active PLHIV clients
 - ART drug pick-up

Search for a dashboard **Summary of DSD ART Model Enrollment in Eswatini**

Reason for ineligibility for less-intensive ART models

Eligibility vs enrollment on ART Care Models

WHAT IS NEXT?

- Include more indicators such as retention in care vs ART care model
- Updating with additional data so as to create trends
- Once final, share dashboards and provide user rights to Officers within national AIDS Program.

Thank you!
