PEPFAR: Accelerating Progress to End AIDS as a Public Health Threat

Dr. Emily Kainne Dokubo
Deputy Global AIDS Coordinator – Program Quality
U.S. President's Emergency Plan for AIDS Relief (PEPFAR)
Bureau of Global Health Security and Diplomacy (GHSD)
U.S. Department of State

CQUIN 7th Annual Meeting
November 13, 2023

Accelerating Progress to End AIDS as a Public Health Threat by 2030

PURPOSE STATEMENT:

We will accelerate the response to end the HIV/AIDS pandemic as a public health threat by 2030, while sustainably strengthening public health systems.

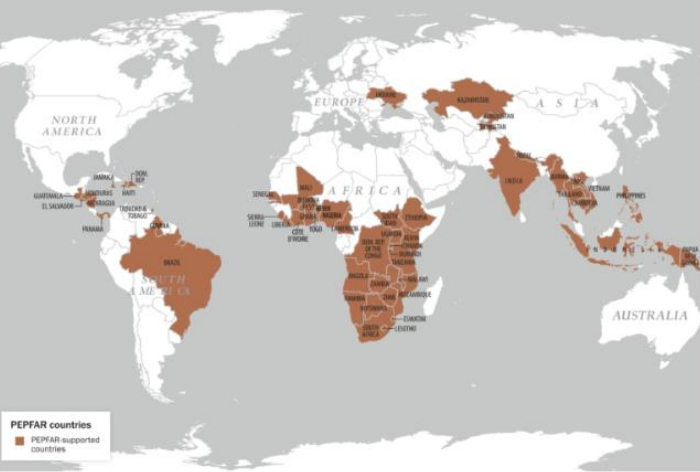

PROGRAM GOALS:

1. Reach global 95-95-95 treatment targets for all ages, genders, and population groups.
2. Reduce new HIV infections dramatically through effective prevention and treatment, in support of UNAIDS targets.
3. Close equity gaps for priority populations, including adolescent girls and young women, key populations, and children.
4. Transform the PEPFAR program towards sustaining HIV impact and long-term sustainability by strengthening the capabilities of governments to lead and manage the program, in collaboration with communities, the private sector, and local partners.
5. Make measurable and sustainable gains in partner country public health systems and health security to strengthen public health prevention, data, and response capabilities for HIV and other health threats.

Differentiated Service Provision to Achieve 95-95-95 by 2025

PEPFAR World Activities, 2022
U.S. President's Emergency Plan for AIDS Relief

Countries Have Varied Progress Toward Achieving 95-95-95 by 2025

Near / Reached 95-95-95

- Botswana
- Burundi
- Eswatini
- Lesotho
- Malawi
- Namibia
- Rwanda
- Zimbabwe

Near / Reached 90-90-90

- Cameroon
- Ethiopia
- Haiti
- Kenya
- Nigeria
- Tanzania
- Uganda
- Vietnam
- Zambia

Below 90-90-90

- Angola
- Cote d'Ivoire
- Democratic Republic of Congo
- Mozambique
- South Africa
- South Sudan
- Ukraine

- Providing combination prevention to achieve rapid reduction of new infections
- Decentralizing prevention options with focus on person-centered care

1st 95

- Providing differentiated person-centered HIV testing services
- Decentralizing HIV testing with self-test kits

2nd 95

- Strengthening early linkage to care
- Supporting treatment continuity through integrated person-centered services
- Tailoring programs to the needs of the population

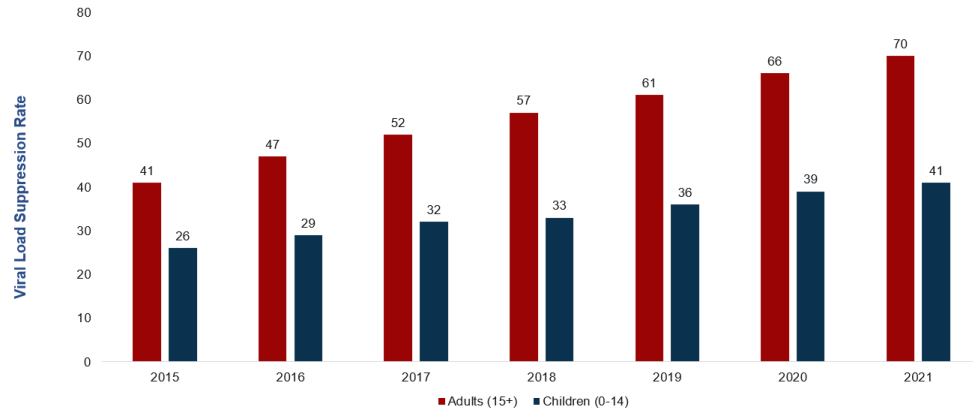

3rd 95

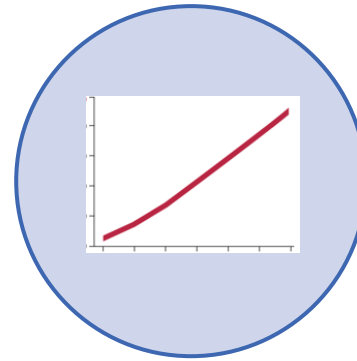

- Optimizing treatment regimens across age bands
- Decentralizing laboratory services
- Expanding multi-disease testing platforms

Optimizing Service Delivery to Ensure Health Equity for Priority Populations

Major Gaps in Viral Suppression Between Children and Adults

Data

- Routine review of age and sex-disaggregated data with a focus on specific youth cohorts such as KPs, those who are pregnant and breastfeeding, etc.

Policy

- Support accessibility of HIV services for youth and encourage policy reform where age of access barriers remain
- Support access to facility and community-based multi-month dispensing

Programming

- Ensure services are youth-friendly, with emphasis on AGYW
- Support HIV disclosure for children and adolescents and promote linkage to youth-friendly services
- Ensure that providers are trained to respond to disclosures of GBV
