

Closing Remarks

Peter Preko, MB ChB, MPH

CQUIN PI and Project Director, ICAP at Columbia University

Integrating non-HIV Services into HIV Programs

April 15-18, 2024 | Nairobi, Kenya

Integration Meeting – CQUIN Key Messages

- **Joint coordination and planning** by the different departments must be considered a priority
- **Define your standards** – clarify what you are integrating and how it should be integrated
- **One-stop shop is the gold standard** – countries must aim for this if resources allow
- Alternative integration approaches must ensure **peer navigation** and **effective referral systems** to document completed referrals
- **Define what success looks like** so you can measure it
- **Donor Flexibility** – how can we walk this talk?
- **Put the recipient of care at the center**

“If a bacteria and a virus can work together, why can’t we”?

Dr. Ruth Masha

My Take....

Don't call it integration if you cannot confirm and document that you have assisted the recipient of care on ART to get the other non-HIV service(s) they need

Next Steps

- Countries are encouraged to conduct in-country to validate the final draft action plans with key stakeholders
- Validated final actions to be shared with ICAP-CQUIN by June 3rd
- CQUIN will continue learning exchange on integration in the respective communities of practice virtual meetings and future webinars

dHTS Meeting – July 9-12 , Durban, South Africa

8th Annual Meeting – Dec 9 - 13, Johannesburg

Order of Remarks

- Wokie Cole, LibNeP+, Liberia
