

Kenya EMR+: An integrated system for managing HTN in PLHIVs

Dr Yvette Kisaka
Ministry of Health - Kenya

CQUIN Integrating non-HIV Services into HIV Programs Meeting

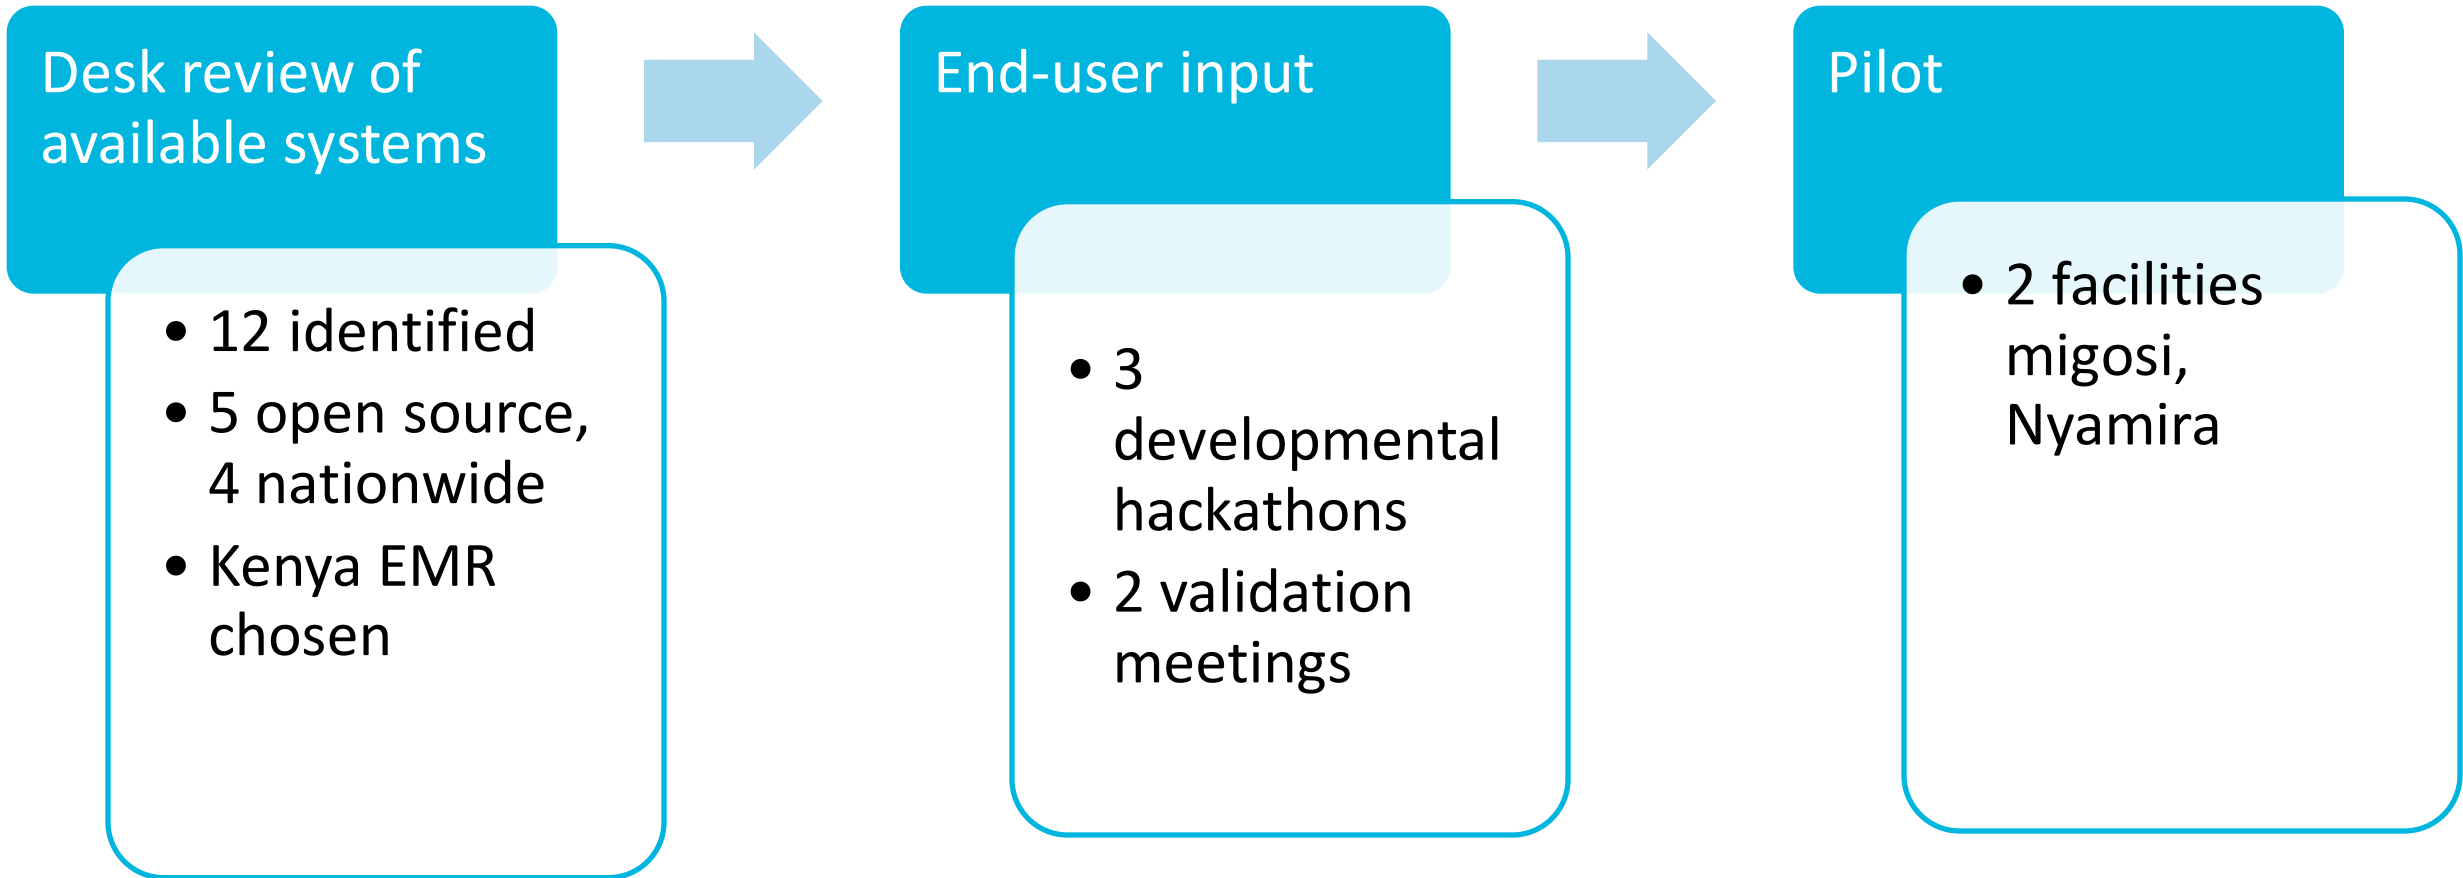

April 15-18, 2024 | Nairobi, Kenya

Kenya EMR+: Introduction

- Kenya EMR+ is an integrated EMR system for the management of HTN/HIV
- Based on OpenMRS
- A one-stop shop - screen, link and provide care for people living with HIV and hypertension
- Provides a common interface for different forms and tools used to manage different conditions, saving time.
- Most of the electronic systems used in Kenya are unable to capture hypertension data
 - Hence, the need for an integrated system.

Process of Development
