

USAID DISCOVER-Health I2- Multi-Month Dispensation (I2 MMD) Implementation Update

Adamson Paxon NDHLOVU, BScHB, MBChB, PgD, MSc
John Snow Inc., Lusaka, Zambia

CQUIN 8th Annual Meeting | December 9-13, 2024 – Johannesburg, South Africa

Background

6
MMD

- WHO recommended for clinically-stable recipients of care
- Several studies in Sub-Saharan Africa demonstrated the benefits and that 6-MMD is non-inferior to 3-MMD
- 6-MMD generally considered **standard of care**, with growing interest for longer ARV dispensing intervals

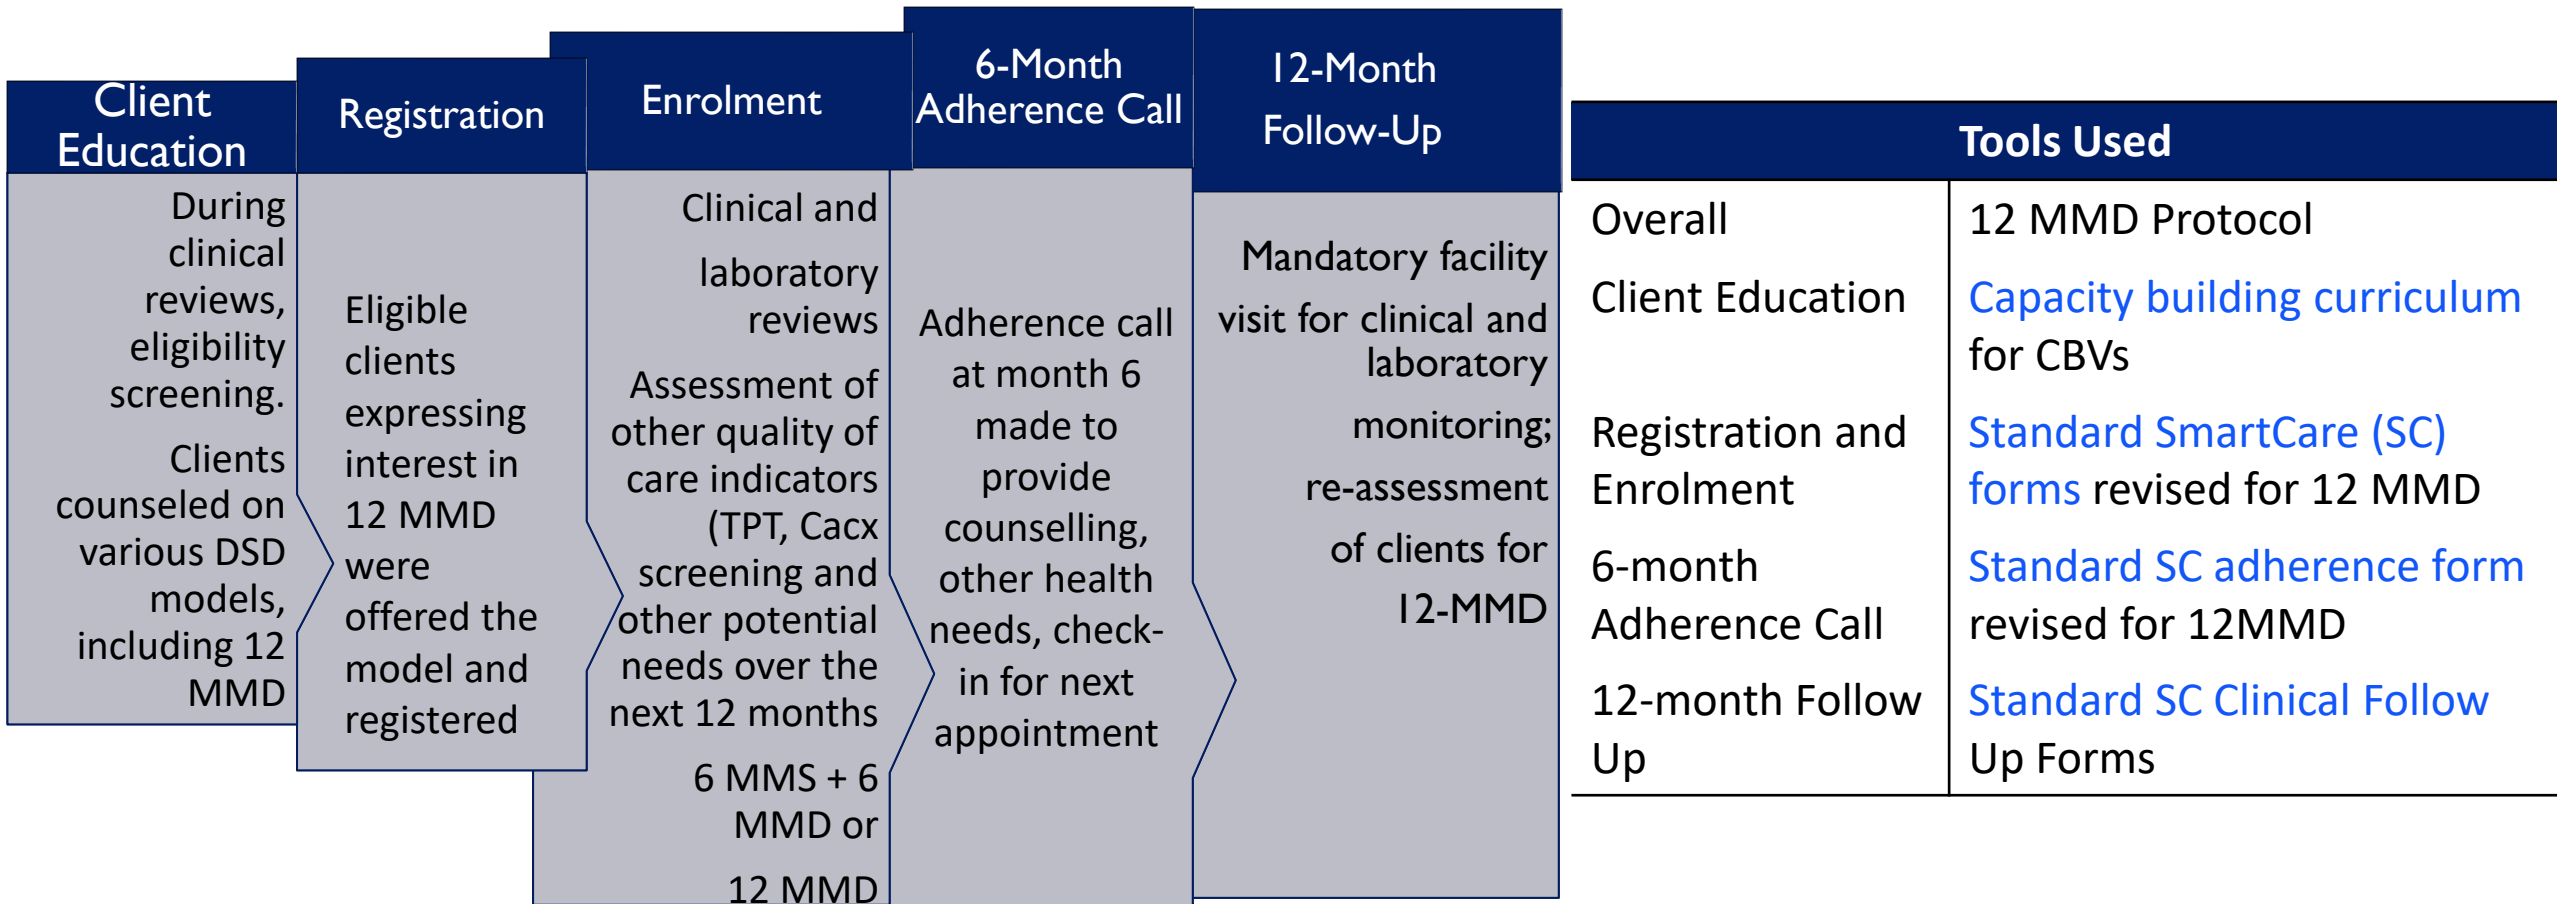

12
MMD

- Rationale: USAID Project piloted the 12 MMD as part of interventions to **mitigate observed high treatment interruption** in some districts

12 MMD Implementation Building Blocks

Model Type	Facility Individual Model
Name of Model	12 Multi-month Dispensation (12-MMD)
Settings	Urban/rural
Number of RoCs in a group	Unlimited
Eligibility Criteria	Stable Clients, likely to travel out of town within 1 year
	Valid viral load result within one month
Clinical Reviews/Viral Load Collection	
Who	Physician, Clinical Officer, HIV Nurse Practitioner, Nurse
When	Every 12 months
Where	Health facility
ART refill	
Who	Pharmacist, CO, HNP, Nurse, CHW, CHA
When	Every 12 months
Where	Facility and community – delivery by CHW (case-manager)

Implementation Pathway

6 months Adherence Call Tool

ADHERENCE FORM

Date / /

Patient ID - - - -

Patient Last Name _____ Patient First Name _____ Sex _____ Age

Does the client have case manager/ treatment supporter? Yes No Update treatment supporter information on HIV Summary Sheet

Do you have any problem with the life of taking medication everyday: Yes No

PROBLEMS TAKING MEDICATION

Many clients taking these medications find it difficult from time to time. Does client ever have trouble taking the pills?
 Never Rarely Sometimes Often Very often

Since last visit, has client given any pills to another person?
 Yes No How many pills given to another person? _____

How many doses has client missed in past 3 days?

How many doses has client missed in the past 7 days?
 0: regular pharmacy schedule
 1: monthly call for 3 months
 2 or more: Conduct in person visit within a month

REASON	ACTION
Forgot	Teach patient to use visual reminders or alarms
Side effects	Complete side effects section below
Felt too ill	Counsel on the importance of taking meds to feel better, refer to CO/MO
Away from home / travelling	Counsel patient on taking meds away from home
Attending a funeral	Counsel patient on taking meds away from home
Problems swallowing	Refer to CO/MO
Patient ran out of meds	Counsel on coming before meds finish, refer to pharmacy, use treatment supporter
Clinic ran out of meds	Alert ARV Nurse in Charge
Patient lost meds	Counsel patient on benefit of meds, consider using pill box
Did not want to take meds	Counsel patient on benefit of meds, consider referral to CO/MO
Too busy/disorganized	Counsel patient on benefit of meds, consider using pill box
Not enough food or money	Refer to appropriate organization, if available
Feels depressed	Refer to CO/MO
Feels well	Counsel patient on benefits of meds, emphasize lifelong treatment
Other _____	

POSSIBLE SIDE EFFECTS

Has patient experienced any of the following signs or symptoms recently?
REFER TO CLINICAL OFFICER/MEDICAL OFFICER IF:

- Nausea If causing minimal intake for more than 48 hours
- Vomiting If severe, limiting food or fluid intake or ART, and greater than 24 hours
- Diarrhea If more than 5 times per day, or bloody diarrhea, or if with fever or dehydration
- Persistent headache If severe, requiring frequent painkillers, lasting over 1 week
- Rash If severe, especially if associated with blisters, peeling or pain
- Numbness/pain/burning in legs/feet If new or worsening or impairs walking
- Fever If lasting more than one day
- Difficulty breathing Any difficulty, even if mild, especially if with abdominal pain, nausea or vomiting
- Swelling If new onset
- Fatigue If fatigue worsening since last visit
- Severe abdominal pain If it is too painful for the patient to move
- Dizziness/lightheadedness If persistent or worsening
- Yellow eyes If lasting more than one day
- Other _____

Comments _____

For patients on monthly adherence call follow up: this is visit number _____ of 3 monthly discussions.

12 MMD related Questions (tick what is applicable)

Sex: Male Female

Age: 16-19 20-24 25-29 30-39 >40

Client Category: Migrant worker/Mobile Population
 Others Indicate: _____

Reasons for 12MMD:
What made you enroll for 12 MMD?
Tick all that apply

- To avoid frequenting the health facility
- To suit my business schedule
- To suit my work schedule
- To reduce the frequency of hospital permissions at work
- Others Indicate _____

Benefits of 12MMD:
What benefits have you observed with 12 MMD?
Tick all that apply.

- Cost saving
- Time saving
- Few work/business disruption
- Privacy and stigma reduction
- Others Indicate _____

Challenges of 12MMD:
What challenges did you experience with 12 MMD?
Tick all that apply

- Storage facility and safety at home
- The burden of carrying medicine bottles on the refill day
- Others Indicate _____

How has your experience been with 12 MMD?

Yes

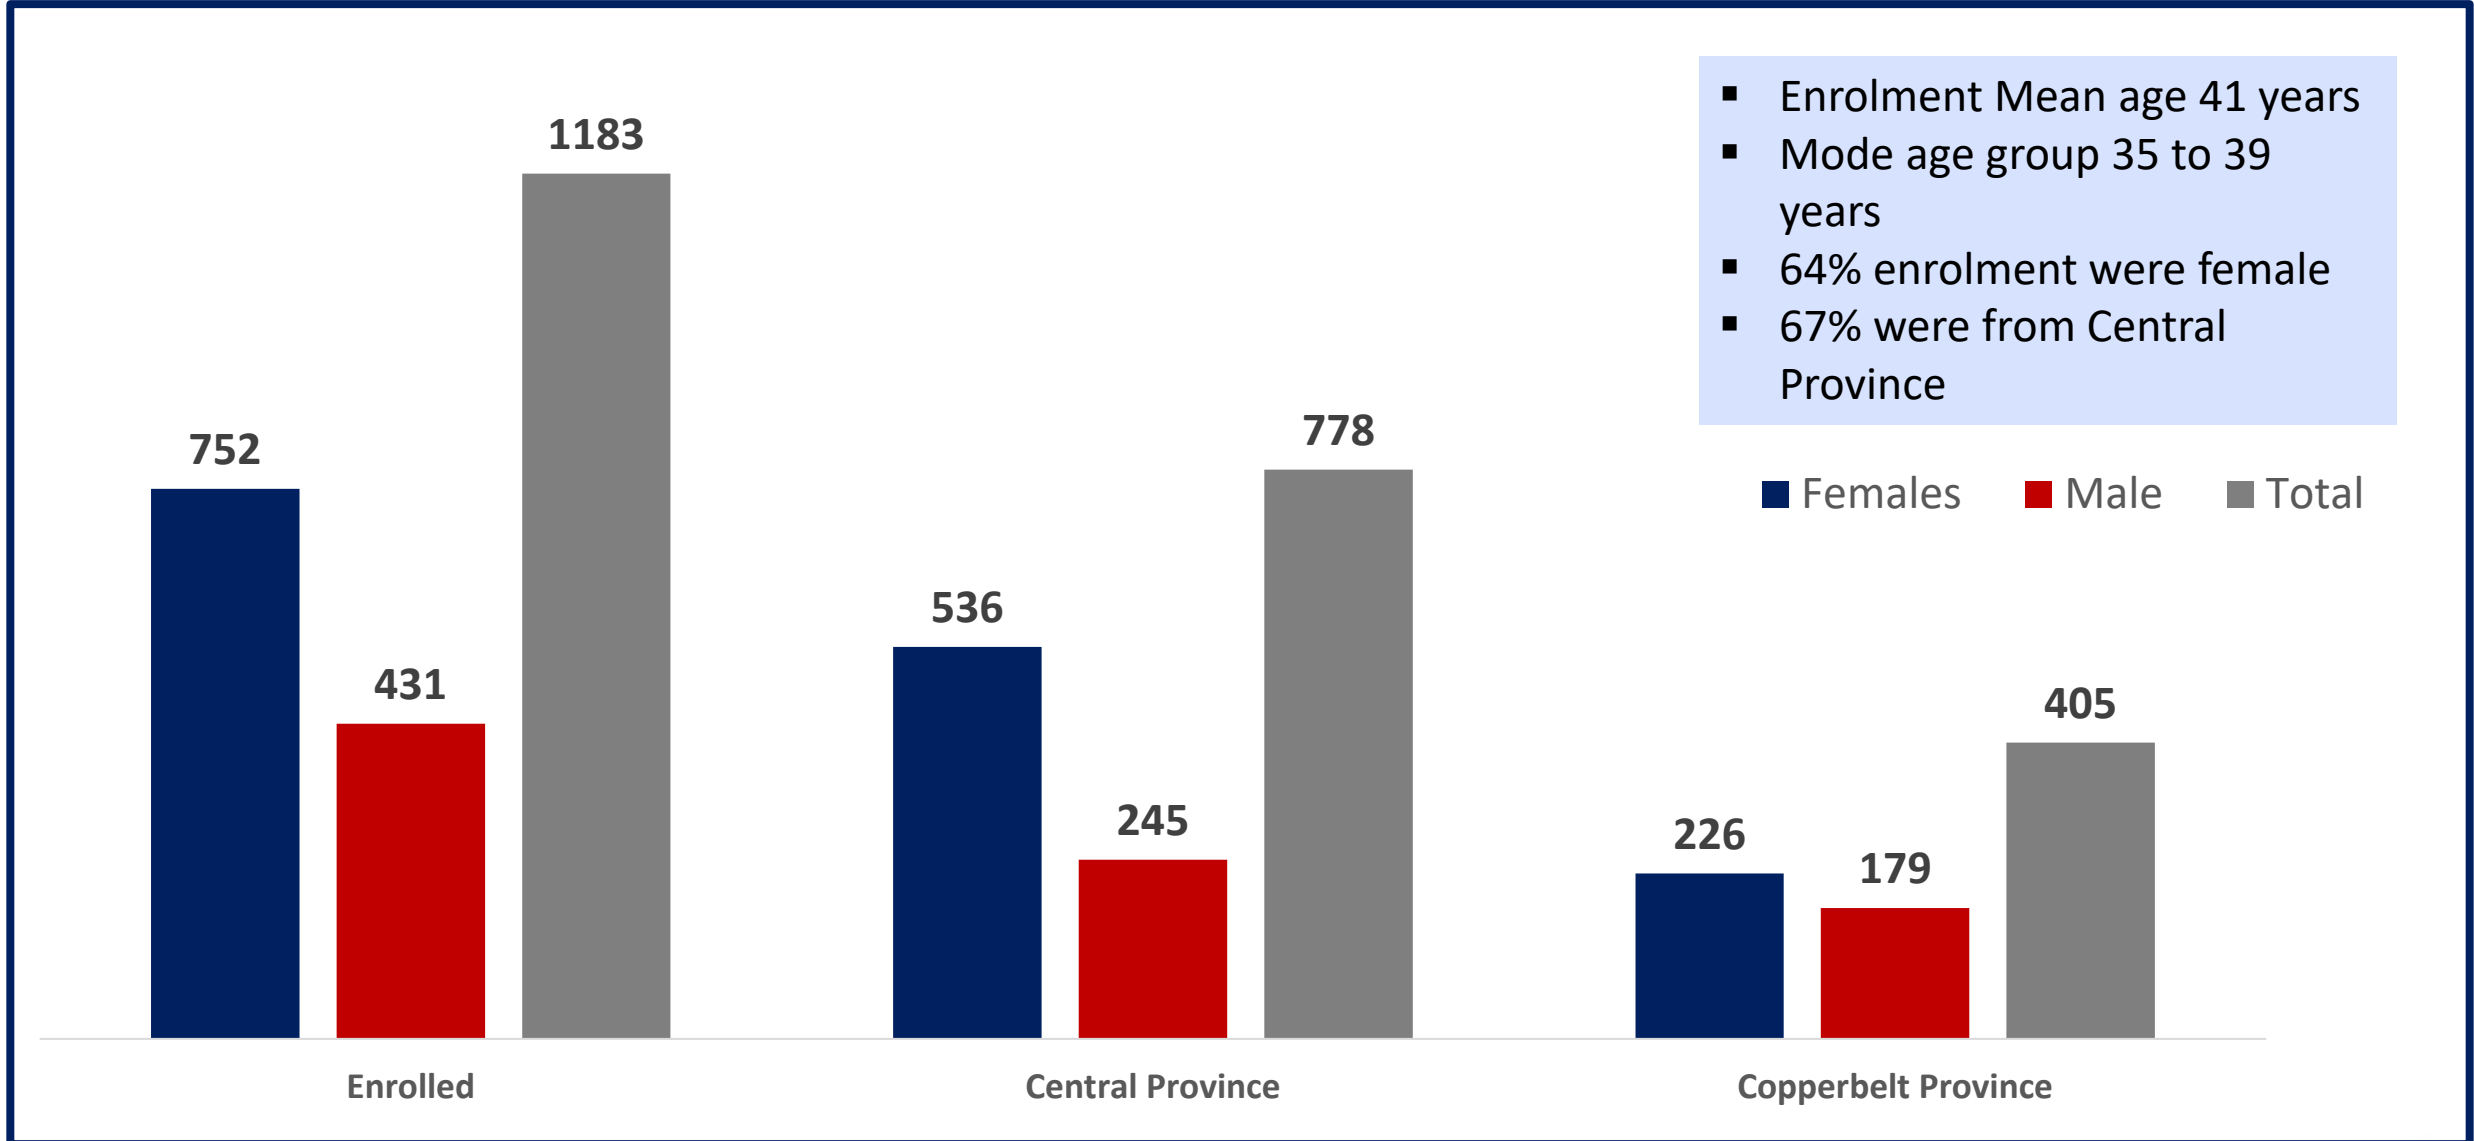

No

Not sure

Give reasons for your answer above:

PAGE 1 OF 1 ADHERENCE V3.20.6_12MMD

12 MMD Enrolment distribution

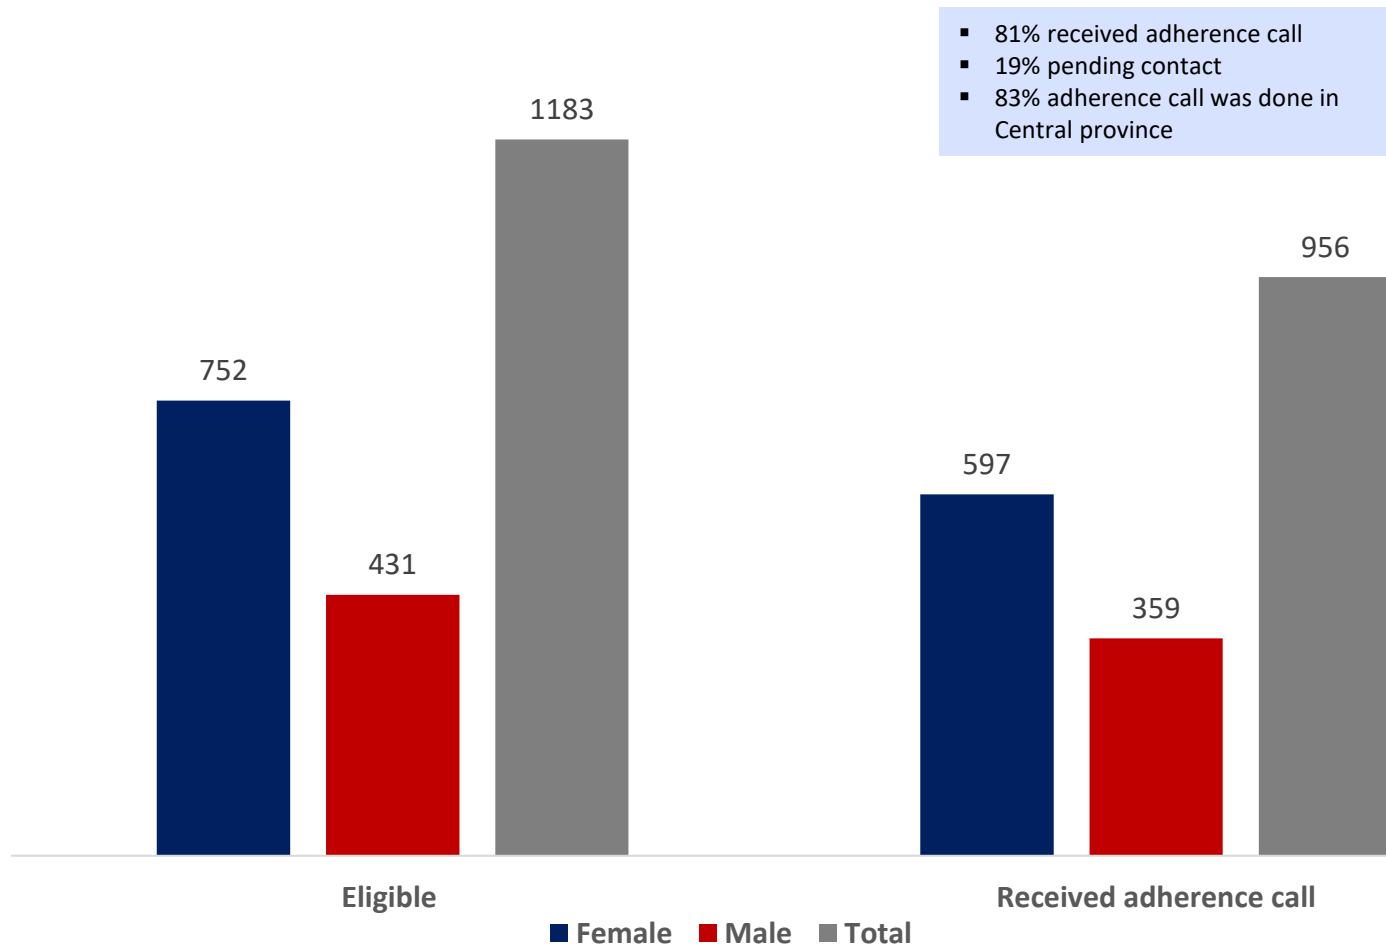

6 months adherence call outcomes

Methodology:

- A total of 956 clients were contacted either by phone or through visits to offer adherence calls.
- Cross-sectional data was collected using an adherence call form and summarized quantitatively.

6 Months Adherence Call by Gender By April 2024

Retention in Treatment: after discounting for Trans-Out, 99% of clients on 12 MMD still Active on treatment

Sex	Patient Status				Total
	Active	Dead	LTFU (Missed 30> days)	Trans-outs (include silent transfer)	
Female	596	0	1	11	608
Male	360	1	3	2	366
Total	956	1	4	13	974

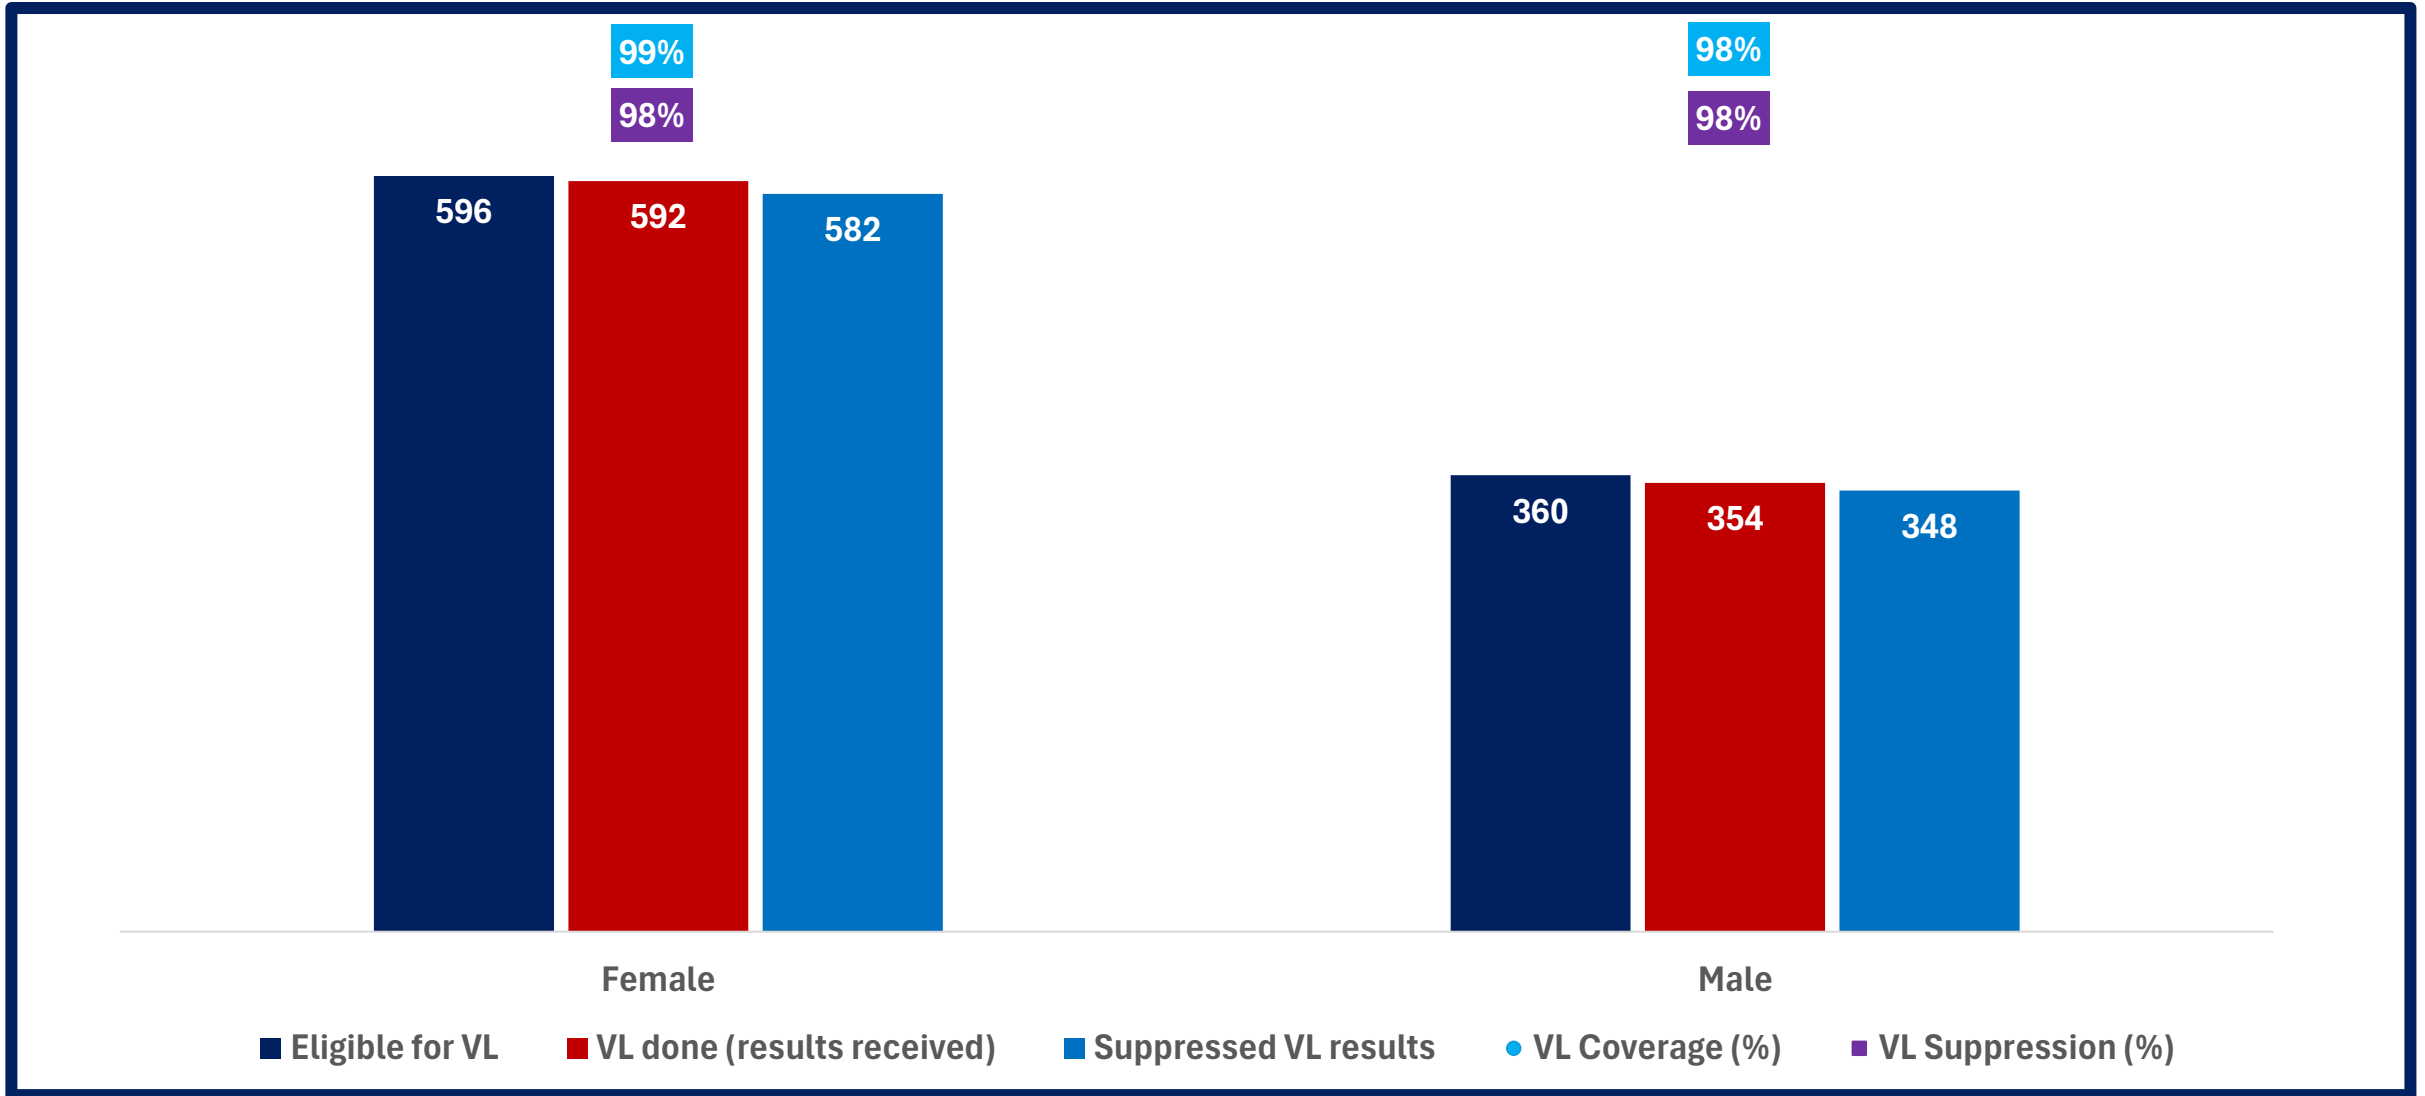

Crude Retention: $[Active/Total]$

→ **98%**

Pure Retention $[Active/(Total-Trans-out)]$

→ **99%**

VLC and VLS above 98%, 12 MMD clients at 12 months

Thank You!
