

Transform towards Country-owned and Sustainable AIDS response

Gang Sun, UNAIDS

Turning Challenges into Opportunities

External financial dependency by intervention and region

| | ESA | WCA |
|-----------------------|---------|------|
| ART | 38% | 91% |
| Condoms | 34% | 44% |
| EID | no data | 100% |
| HSS | 99% | 100% |
| HIV Testing among KPs | 81% | 100% |
| Lab Systems | 20% | 99% |
| Pediatric ART | 65% | 100% |
| Prevention | 76% | 92% |
| Strategic information | 88% | 83% |

Ref: Mattur D. @UNAIDS

- Donor dependency
- Externally- funded Community-Led Services
- Fragmented systems
- Rise in Punitive Laws

- Have we tried all options to increased **domestic investment** (taxation policy, debts relief)?
- Have we **maximized the usage** of resources (efficiency gains, system harmonization/integration, local production)?
- Have we exhausted efforts to secure **global solidarity**?
- Have **social-contracting** for CLOs been scaled up?
- Have we accelerated **legal reform for human rights as public goods**?

People-centeredness

Innovation

HIV Literacy

Activism

CQUIN 9th Annual Meeting

Delivering Differently: Prioritize. Adapt. Sustain

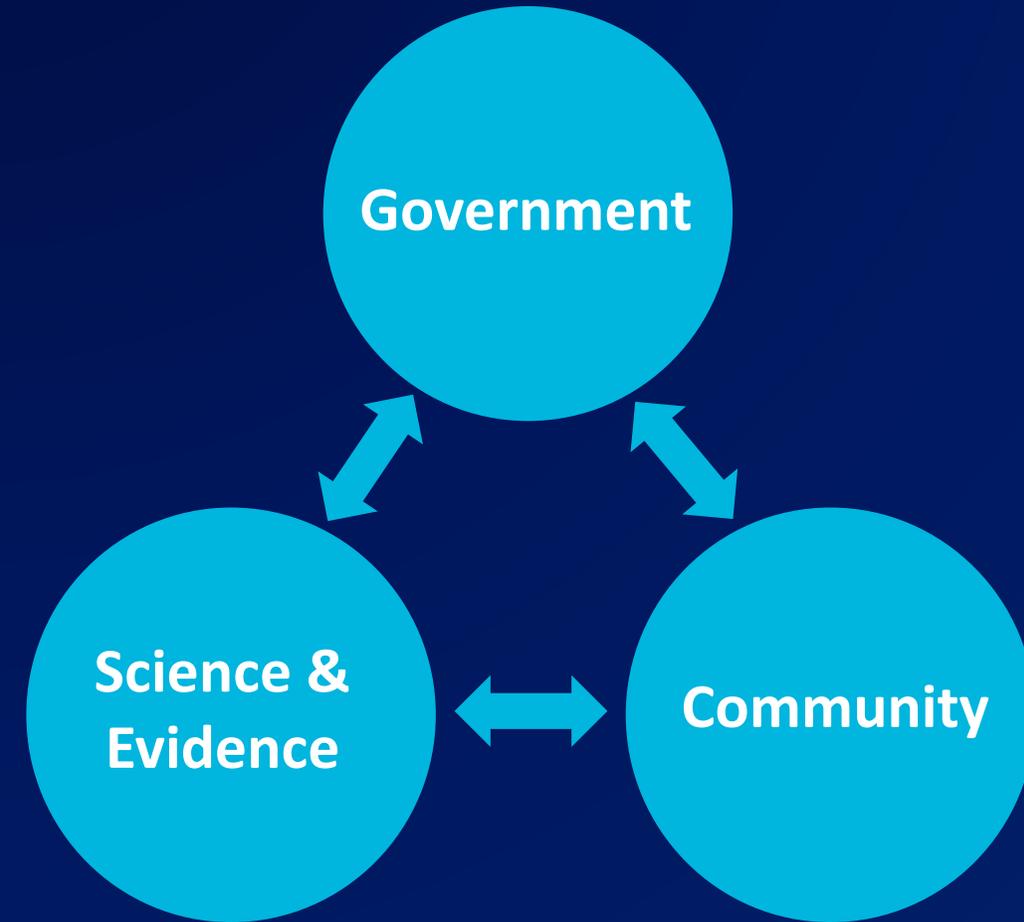

“Because we are poor, we cannot afford not to have universal health coverage” by H.E. Prof Emeritus, Piyasakol Sakolsatayadorn, Thailand Minister of Public Health

What can we learn from Thailand’s UHC experiences

- *Three wheels move mountain*

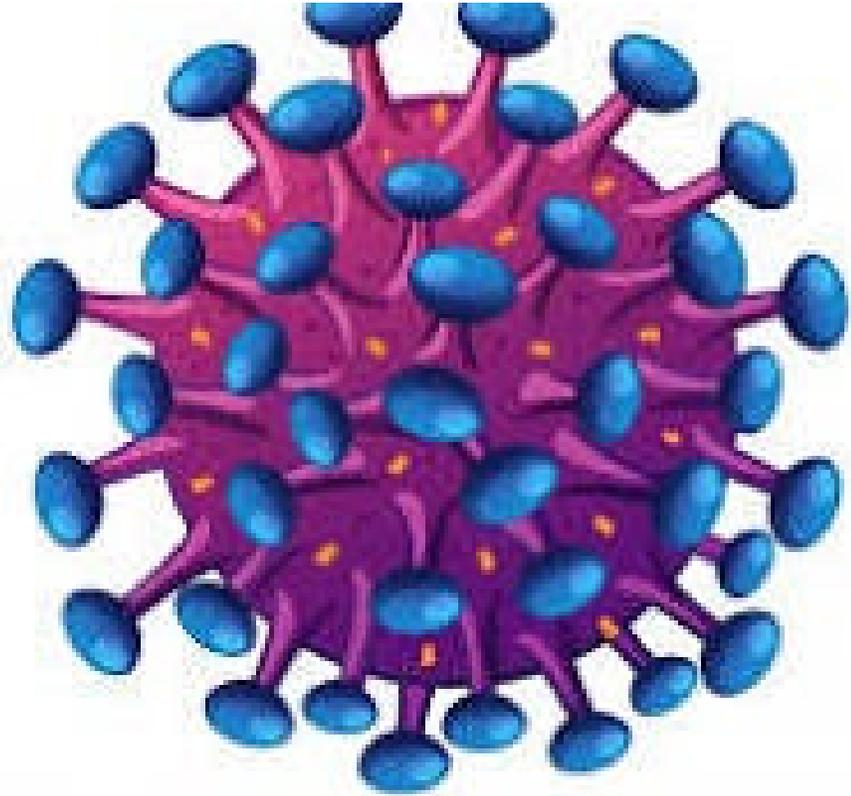

What UNAIDS can offer?

- World AIDS Day Report 2025
- Global AIDS Strategy 2026-2031
- UN High-level meeting 2026
- Facilitation of country Sustainability Roadmap processes and advice for transition financing
- Global reference on HIV strategic information, target setting, response and gaps
- Support an inclusive data governance and stewardship that can answer the needs at all level
- CLM Maturity Assessment tool
- *And* continued advocacy, coordination and amplifying the voice of communities...

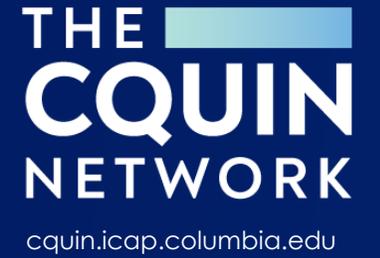

Have we learnt from the enemy?

- **Adaptation in threatening environment**
- **Using all resources to serve its purpose**
- **Constant evolution for self-sustainment**

A transformed HIV response
may show the way how
health programmes
evolve!

Thank you!
