STANDARD OPERATING PROCEDURES (SOPs) FOR INTEGRATION OF KEY POPULATION PROGRAMME INTO HEALTH FACILITIES IN KENYA

Strengthening Inclusive, Quality, and Integrated Health Service

A practical guide for service providers, program managers and implementing partners

John Mbau

Works in Progress: Transforming the HIV Response in a Time of Change, April 20-22, 2026 | Nairobi, Kenya

Introduction

Key populations transition SOP is a tool that was developed by KP stakeholders to guide transition and integration of the key populations program into primary health care systems

Key Populations Integration SOPs

Purpose

The tool is a guide to counties and implementing partners on how to transition and integrate Key populations services into primary healthcare systems Standardize transition and integration of KP HIV services into health facilities

The tool helps counties to ensure :

- Sustained coverage, access & quality of services to key populations
- Provision of stigma free services to key populations
- Promote sustainable, efficient, high-impact interventions

Scope

- The tool is used by National Government ,County health management Teams , Communities and CSOs ,Implementing partners and Donor agencies to guide on transition and integration of key populations services

KEY POPULATIONS SOP DEVELOPMENT PROCESS

1. Virtual enagement with key populations stakeholders
2. National key populations TWG meeting
3. meeting to develop draft 1
4. virtual engagments to finalize on the SOP
5. Vlaidation of the KP SOP
