Works in Progress: Transforming the HIV Response in a Time of Change, April 20-22, 2026 | Nairobi, Kenya

*“We’re not going back to the Moon the way we did before -
we’re building something sustainable for the future.”*
— Commander Reid Wiseman, NASA Artemis II

If everything is integrated, but nothing is differentiated - everyone loses.

Integration is happening. But design is lagging.

**Most health happens between visits -
not inside facilities.**

Integration must preserve and strengthen DSD - not replace it.

The future of HIV service delivery is not predetermined - it is being decided now.

 Scan to shape the future of HIV service delivery

“We’re not going back the way we did before – we’re building something sustainable for the future.”

- CQUIN meeting participant, April 2026

Thank you
